MINUS SIGNS DOMINATE GENERALLY SLUGGISH MARKET

Trading Reacts to Continued Decline in Gold and Silver Bullion Prices

The Market in Depth

ALLEN HARRIMAN

In one sense, the enclosed June issue of the MONTHLY SUMMARY might remind readers of numerous issues which appeared during the "golden days" of 1979-early 1980. Once again, major changes have been recorded for a vast majority of the many listings in all three uncirculated categories. But, unfortunately, the similarity ends there. This month's extensive price adjustments are accompanied by minus signs---rather than the plus signs which became routine during that earlier time. Of course, these new price levels are not unexpected in view of the latest round of lower "type" prices of the past few weeks. The slightly scarce to truly scarce "dated" issues have simply followed the trend set by the common issues in the various series. The fact is that most of the "date collectors" are currently watching from the sidelines---and to even a greater extent than the "type" buyers. Thus, if the "type" issues in a particular series have moved lower, a majority of the other dates have followed the example. The trend has been verified at recent auctions, at recent coin shows, through various selling lists, and also on the teletype selling messages. It is hardly surprising that potential buyers have assumed this "wait and see" attitude. After all, there is no reason to rush into purchases as buyers did two/three years ago. Why not wait "until the smoke clears" and buy at the best possible prices?

Bullion prices continue to surprise many. Last week's skidding levels were hailed by some as the "last bottom"---but this proved not to be the case. On Monday of this week, silver was pegged below $5. And gold briefly dripped below $300. However, several major bullion dealers have reported considerably increased sales---especially of silver. The silver/gold ratio, by the way, was an unprecedented "60 to 1"!

And, in the area of bullion and usually "bullion-related" material an interesting thing has occured---or rather, has not occured. During the past few weeks of lower silver prices, the usual quantity of late BU silver rolls (dimes, quarters and halves dated after 1959 or so) has failed to be offered for sale at commensurately lower prices. In fact, very few of these "common" rolls are being listed for sale at all. Obviously, the "melt factor" has to be considered---for great quantities of this material were melted during the days of peak silver prices. In addition, it seems apparent that those who still hold these rolls are in no mood to sell them at the old "few dollars above junk silver" prices. Bid for the dimes is a firm $32/$33 (with one buyer offering as much as $34 for some dates in this group) for the quarters it remains at $64/$65---and the previous levels still apply to the various half dollar issues. Whether this remains the case, of course, will be seen. But, at the moment, these late "common" rolls don't seem so common!

The 1979-S "type two" proof set has retrenched just a bit again. Bid/ask is $125/$135 this week---with scattered sales registered within this range. Changes among the individual rolls from this set have been noted for the recently "hot" Kennedy halves (now $725/$790); the Anthony dollars have moved lower (to $1750/$1900). Current bidder interest in this area once again centers on the dollars---with a number of dealers now in the "bargain hunting" frame of mind rather than simply buying at the prices occasionally listed on the various teletype circuits. The 1982-S proof Kennedy roll (the only half dollar scheduled to carry this date) remains steady at $260 bid; continued mild interest is evident.

This Week's Market

CENTS: A few dealers continue to offer to buy scattered dates among the BU Lincoln rolls---with occasional "want lists" including a few "gem rolls" at mid-bid/ask. In general, however, this area must be considered rather quiet. Several more minus signs dot the page four type coin issues---again with very few actual transactions being recorded.

NICKELS: The Buffalo nickel "short set" group has reflected the followoing lowered price levels: 1934-P - $3000/$3250, 1935 - $5500 bid, 1935-D $3750 bid, and 1936-S - $1700/$1850. The widely scattered bargain offerings of gem 1938-D rolls are usually picked up at the listed selling price. (This roll is generally very nice---well struck coins with blazing luster; they are excellent for "type" singles.) Bidding among the Jefferson issues remains very light.

The three-cent silver pieces have now been included in the adjustments to lower levels---in all three uncirculated and proof grades.

DIMES: Four of the better date Mercury rolls are also listed within reduced price ranges this week: 1934-P - $2300/$2500, 1940-D - $1250/$1350, 1941-D - $875/$950 and 1942-S - $1000/$1085. The recent lower price levels for the individual rolls has affected both the 1934-45 and 1941-45 BU roll sets---check page five. Prices are firm in the lightly traded Roosevelt series.

Seated Liberty half-dimes and dimes have joined the trend of the rest of the type coin market. (These issues---along with most of the other type coins---present an interesting phenomenon. Though "getting the price" is definitely a problem---even for "top end" MS-65's---surprisingly few coins of this quality are available.)

QUARTERS: The Washington rolls, too, must be termed "quiet". Few bidders are noted---yet, when a bidder needs a particular roll or two, he usually has to search for a long while. Again it seems that those who have these rolls (especially the tougher dates) are not very interested in parting with them.

The Seated Liberty quarters in uncirculated and proof condition have followed the example set by the half-dimes and dimes---see page four for details.

HALVES: As the enclosed MONTHLY SUMMARY will show, this is still a bright spot in the market. Plus signs cover all of the 1934-47 Walking Liberty singles ("typical" rolls are of little interest) and the "full bell lines" Franklins have also scored further gains. Again, however, the usually encountered rolls are receiving very little attention---with the 1949-S, 1954-PDS, 1956-P and 1959-P recorded within lower bid/ask ranges.

And it should come as no surprise that the Seated Liberty half dollars are in the same boat as the smaller denominations. (But, again, it should be pointed out that there are buyers "at a price". In every "down cycle" of the market there are those astute and far-thinking dealers and investors who seize the opportunity to look for the real bargains ---and to negotiate prices to their advantage. This is in contrast, of course, to those days of the opposite swing of the cycle when the sellers had it all their way.)

DOLLARS: Here also a number adjustments (toward the lower side) have been registered. Still, gem silver dollars in both series are holding up well---particularly when considering the rest of the market, bullion prices and economic conditions in general. And, once again, we feel that it is important to mention that there are two or three regular bidders who will pay "over bid" for many dates if they are "top end" MS-65 gems.

Prices in both the Eisenhower and Anthony dollar series have drifted lower; moderate trading continues to be recorded.

PROOF SETS and MINT SETS: Bid/ask levels for the 1936-42 proof sets aare lower. On the otherhand, a number of advances have been noted for gem singles in this date group. Changes among the various other issues are mostly of a minor nature---with the 1982-S set recording perhaps the largest drop (to $19/$20.50) as more sets are delivered by the Mint.

COMMEMORATIVES: After many weeks of virtually unchanged price levels, a scattering of minus signs will be found on the page two silver commem charts. This area is definitely not immune from the current bargain-hunting mood; those who are interested in buying in this area are also searching out top quality pieces "at a price".

U.S. COLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $301.60 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

DEALERS

Need a Single Coin or Stamp?

Don't let your customer leave your store dissatisfied. Especially in the collector market of today.

We fill dealer orders for circ or BU coins, either singles or rolls, so don't fail to fill that set of Lincolns or Washingtons for lack of a coin in your inventory. We can fill your needs probably. Reasonably, too. The same goes for U.S. Paper money, Colonial, Nationals, BEP sheets, Error notes & Radars. We stock mint and used U.S. stamps, in Avg or F or VF hinged or NH. We also handle the Disney stamp issues; other collector items we have available are baseball cards and sets, postcards, Rockwell & Hummel figurines. We also have 400-500 different collector plates from B & G to Hummel to Rockwell, etc. so advise your needs---you can't lose if you try to satisfy your customer needs.

The collectors are back in the stores - so work with them.

Please write or call in your needs, or stop in our store in the Berlin Mart in Berlin, N.J.

'79-S "TYPE 2" PROOF SET REBOUNDS

Type Coin Slide Eases After Recent Major Adjustment

The Market in Depth

ALLEN HARRIMAN

The very volatile 1979-S "type two" proof set has rebounded once again. The impression given by trading last week was that adjustments to lower levels were indeed in the cards. But, such impressions can be misleading - - - and this one was. Several buyers have again entered the market this week and bid is, as of this writing, at least $140 per choice set - - - with one dealer willing to pay a bit more. Quantities are wanted by several buyers. With the exception of the Anthony dollars, the individual "type two" rolls haven't fared as well. The dollars are bid at a higher $95 per ($1900 a roll) - - - but there the plus signs end. The recently "hot" Kennedy half dollar rolls continued their decline this week with the bid/ask level now recorded at $650/$710. The Washingtons have also lost ground - - - they are currently in a $200/$217.50 range. And the Jefferson rolls have also been listed for sale at reduced price levels - - - now $160/$175. Only the Roosevelts and Lincolns have remained unchanged - - and trading in both rolls has been very light.

The asterik which accompanies both the 1982—S proof set and 1982—S Jefferson roll prices is due to the fact that it may well turn out that "type one" and "type two" price listings will be necessary for this set. Already one hidder is offering to pay $20 for the "type one" version of the proof set - - and only $15 for the "type two". This difference, as discussed in previous columns, lies in the Jefferson nickel. (A change in the reverse die was made about mid-April - - a change which affected both the proofs and the circulation strikes.) The current bid of $150 for the proof Jefferson roll applies only to the "type one" roll; no specific bid has yet been noted for the "type two" roll. We will keep a close watch on this situation - - and, if it develops that two separate price listings become necessary, they will be added to our weekly coverage.

Only a few changes will he found on the page four type coin charts this week. The recent lowering of prices for a majority of the uncirculated and proof issues was rather extensive (as were those in last week's June issue of the MONTHLY SUMMARY) and they brought bid/ask levels in line with present activity at auction, at shows and over the teletype circuits. As always, it must be stressed that prices in all three grade columns are for very strictly graded coins - - and today's buyers know the difference! It should also be added that "optimistic" grading is definitely not limited to the MS-65 category. It is not at all unusual to find MS-60 or MS-60+ coins described as MS-63 - - or to find AU-55 coins graded as MS-60 - - and so on. In fact, one needs to know how to classify coins into all grade categories - - all the way hack to the difference between About Good and Good! (One of the more abused areas, by the way, is XF and AU - - nice XF's with a hit of luster are very frequently placed in the much higher priced AU category.)

This Week's Market

CENTS: Changes are minimal this week among the various cent issues. A few lower bid/ask prices will be found scattered across the BU roll charts - - and a few "types" are a bit lower in the MS-60 column. Light (at best) trading continues. It should be added that at least one frequent bidder is in the market for strictly gem MS-65 Lincoln singles in the 1931-42 group - - and that gem specimens of the proof 1970-S "small date" was wanted at $90 or so.

NICKELS: Prices have again edged lower for several of the Buffalo "short set" dates: 1935-S, 1936-PDS and 1937-PDS. Some buyer interest is now evident in this area - - but bidders still tend to "bargain hunt" in spite of recently reduced selling prices. A few issues in the Jefferson series are also lower — notably: 1938-D — $230/$250, 1938-S — $270/$295 and 1939-D — $2300/$2500.

In "type", this week's minus signs have been limited to Three-cent nickels — $600/$675 and Liherty nickels (w/cents) — $550/$610 - - these in strict MS-65 condition, of course.

DIMES: Rather surprisingly, a number of Mercury rolls continue their downward swing; affected this week have been 1939-P, 1940-P & S, 1941-P & S, 1942-P, 1943-P & S, 1944-PDS and 1945-P & D. Buyers (particularly for the mintmarked issues) remain few and far between. The Roosevelts still register only light trading - - with one or two additional bargain-hunters heing noted. The 1955-D & S rolls have recorded the only price changes at $46/$50 and $41/$45 respectively.

The sole adjustment among the type coins is for the Barber dime - - the MS-65 version is now in a lower $700/$785 range.

QUARTERS: Three of the earlier P-inint Washington rolls have recorded lower bid/ask ranges this week - - both the 1935-P and 1936-P are now pegged at $1500/$1635 and the 1937-P at $1600/$1750. And the 1979-S "type two" roll has slipped considerably - - see "The Market in Depth". "Type" remains unchanged after the major lowering of most prices during the past couple of weeks. All in all, this is an especially quiet area.

HALVES: Last weeks levels remain in force for the 1934-47 Walking Liberty singles - - even though potential buyers continue to report a scarcity of gem specimens at these levels. This also apparently holds true for gem MS-65 Franklins (except that one bidder is already offering to pay slightly over the bid levels reported in the June MONTHLY SUMMARY). However, as discussed last weck, "typical"BU rolls in both series are currently of little interest - - even at "discount prices".

DOLLARS: Depressed bullion prices continue to take their toll among the BU dollar rolls; lower prices have been noted this week for most of the 1880-96 P-mints along with the 1883-85 and 1904 O-mints. It must be remembered that the page six bid/ask levels are for "typical" BU rolls - - not for rolls which include a few "sliders" and not for "selected" rolls of better than usual quality.

While a number of adjustments have again been made for the MS-65 singles, it should be mentioned that two or three bidders are still offering to pay ask((or even more in many cases) for the "right" speciments.

PROOF SETS and MINT SETS: The 1979-S "type two" proof set has registered a quick and sudden comeback. Bid has moved back to $140 this week (up $15) - - with at least one anxious bidder already offering to pay as much as $145. "Choice, original, toned" pre-1959 mint sets remain on current buying lists; potential buyers continue to offer "at least bid".

COMMEMORATIVES: Further adjustments to lower levels have been made for a number of the silver commem issues. There still aren't very many sellers - - but, on the other hand, there are fewer buyers at the moment. The eleven gold issues are firm.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $310.70 per ounce

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

MARKET QUIET AS SELLERS CONTINUE TO OUTNUMBER BUYERS

An Examination of Proof Set Performance Since Early 1979

The Market in Depth

ALLEN HARRIMAN

In comparison to most other areas of the current numismatic market, proof sets have been more or less "settled down" into what might be considered a relatively normal trading pattern for some time now. Though the number of actual transactions is definitely limited when measured against the frantic activity (which to many became to be regarded as "normal") during 1979-mid 1980, proof sets remain a "staple" in the general market. There is always buyer interest - - even if a larger percentage of bidders tend to "bargain hunt" during a down cycle of the market. It might be pointed out, in addition, that even during such periods, the dealer who is looking for bargain offerings usually expects only comparatively small discounts - - particularly those who want truly choice sets. It is also very interesting to note that the recent downward adjustments in prices for all of the 1936-64 "silver" proof sets have been minor indeed if viewed in relation to several other areas. And this in spite of an approximate 40% loss in the spot price of silver bullion between January and June of this year. The price of silver, of course, has much more of an effect on the later large mintage sets in the group - - but there does seem to be a resistance level at around $10 for the 1961-64 sets even when bullion slips to new lower levels.

So, before we go any further into this discussion, take a look at the following chart which covers the pricing structure for all twenty-four issues in the group in six month intervals for the past three and a half years. The percentage gains still enjoyed by the majority of these sets may well surprise you. Of course, everyone who currently holds proof sets did not buy in January of 1979 - - so every investor will relate to this chart in a different way. Still, it does present a rather bright picture for those who did buy for the longer term. (The price of spot silver is given under each corresponding date to give readers an insight into the reason for disproportionate gains made by the later sets in early 1980.)

DATE	1/5/79 ($5.97)	6/29/79 ($8.48)	1/4/80 ($38.85)	6/27/80 ($15.31)	1/2/81 ($15.75)	6/26/81 ($10.15)	1/8/82 ($8.23)	6/25/82 ($4.99)	3½ Year GAIN (or loss)
1936	$3250	$3200	$6200	$8000	$7250	$5500	$4500	$4000	23%

1953	55	64	140	190	150	115	100	95	72%
1954	29	33	85	120	90	75	67	61	110%
1955(fp)	23	31	73	95	68	65	58	55	139%
1956	10.75	15.50	30	39	35	28	25	24	123%
1957	7.35	9.25	22	21	19	20	18	15.75	114%
1958	10.40	13	24	31	30	24	22	20	92%
1959	6.65	9	22	21	19	18	18	16.50	148%
1960	5.85	8	21	17	15.50	15	14.75	13.75	135%
1960(sm)	27.50	21	27	45	50	31	27	25	-- 9%
1961	5.20	7.90	21	13.75	13.50	12.35	12	10	92%
1962	5.20	7.90	21	13.75	13.50	12.35	11.50	10	92%
1963	5.20	7.90	21	13.75	13.50	12.35	11.50	10	92%
1964	5.35	8.15	21	13.75	13.50	12.35	10.25	9.75	82%

As can be quickly seen from this chart, the three and a half year advances range considerably - - but, with the exception of the oft' promoted 1960 "small date" set, the vast majority of the other twenty-three issues have turned in relatively impressive results - - ranging from a modest 23% for the truly scarce 1936 set to 189% for the 1942(t2).

First, the 1936-42 sets. This short group of issues presents a diffcrent picture than those which come after in several ways. They were not sold as "sets" - - each denomination was sold individually by the Mint (though, of course, a buyer could order one of each). The mintages of each denomination vary for each year - - thus the published "mintage figure" for sets is determined by the lowest mintage of the five coins in each year. For instance, the 1936 Washington quarter is the scarcest of all regular issues proofs in the entire group - - but it is far from the most expensive due to the fact that interest in the Walking Liberty halves far exceeds that for the quarters. Another factor which places the 1936-42 sets in a special category is that it is from these few issues that a collector must obtain three different proof type coins - - the Mercury dime, the Walking Liberty half and the one-year-of-issue 1942-P wartime Jefferson. This obviously accounts for the fact that the higher mintage and lower priced 1940-42 sets have held up so well under pressure of the current down market - - the least expensive of the sought after type coins coming from those sets. By the way, even in today's market, finding a true gem 1942-P Jefferson can be quite a task; the Mercury is easier - - but mishandled and poorly cleaned pieces abound. And any strictly gem W.L. half is a prize!

The second "group" of sets in the 1936-64 run comprises the 1950 to mid-1955 issues. These were shipped as complete sets in small cardboard boxes - - with the individual coins in separate cellophane envelopes. A great many of those sets which remain as they were received show tarnish lines across the coins caused by the glue used to seal the cellophane envelopes. Thus many coins which might otherwise be gems now show evidence of having been dipped or even more harshly cleaned in order to remove these lines. Also, it appears that many other sets from those years were removed from their boxes early on - - with a high percentage of the individual coins exhibiting at least some evidence of improper handling. For example, finding just the right gem example of the 1950 proof Franklin often proves to be a long and frustrating procedure. A large share of the gains made by sets in this group can be attributed to interest in the Franklin proofs.

From mid-1955 thru 1964, the Mint packaged all proof sets in the familiar heat-sealed packs (thus eliminating the "streak", problem) and except for occasional spotting (mostly on the cent and nickel) all of the issues in this last group of silver sets can be located in choice to gem quality in quantity. It is, of course, this group which is most subject to "promotion" - - since a large number of any of the 1955-64 sets can be accumulated without too much trouble. Still, as the chart above indicates, the price performance for even those dates has been substantial. It might be added also that more and more sets in this later group are being broken up for the gem singles that they contain - - with a strong emphasis on the Franklin half dollar.

All in all, the current proof set market presents a relatively firm picture in view of overall conditions. In future issues we will take a look at other areas of the market - - contrasting present prices with the levels at the beginning of 1979. As the reader can see, at least in this area, a lot depends upon the period of time over which an investment is examined that determines the general picture. Proof sets haven't fared badly at all if one considers the performance turned in since January of 1979.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $308.90 per ounce

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter, inc

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

REBOUND IN BULLION PRICES SPURS ACTIVITY, OPTIMISM

Morgan Silver Dollars Register Several Advances in Gem MS-65 Category

The Market in Depth

ALLEN HARRIMAN

The performances turned in by both gold and silver bullion over the past several days have had a positive effect on the market in general. This is not to say that bid levels have advanced in very many of those areas not directly affected by bullion prices---but the rebound has affected the attitude of many potential buyers (whether dealers, investors---or even collectors). Should this rebound hold, indications are that a cautious optimisum will follow. The next few weeks, of course, are very important ones indeed for the coin market. Several major auctions are forthcoming---including "Auction '82" and the A.N.A. Auction itself. These sales, as usual, will present a vast array of numismatic material of generally high quality and rarity. The results will certainly "set the tone" for many months thereafter. Virtually everyone involved with numismatics in any way will keep an eye on these auctions as well as the bourse floor activity at the forthcoming A.N.A. Convention in Boston.

And spcaking of collectors---more and more evidence points to the re-emergence of the collector. Numerous dealers have mentioned that sales to collectors have been on the increase during recent weeks---and varied "want lists" tend to back-up this fact. This appears particularly evident in the hunt for circulated specimens of the scarcer dates in many series. Teletype buyers now frequently ask for specific issues (in specific grades) in series ranging from half-cents all the way through to Trade dollars. Obviously, the collector is the "backbone" of the industry---and an increase of such activity would be a much needed "shot in the arm" for many areas of the market. Unfortunately, the collector was far too often relegated to a "backseat" by many dealers during the peak trading area of 1978-early '80. A reversal of this attitude is long overdue!

A quick glance at the page six silver dollar charts will show that a number of dates in the Morgan series have made some headway this week. At least two major strong buyers have recently joined the search for gem specimens---with the resulting plus signs noted this week. It should also be added that some of the current bidders continue to offer "over bid" for coins which fully meet their exacting requirements for gem MS-65. (The controversy over just what constitutes a MS-65 silver dollar rages on---especially in view of ANACS grading. Today's bidders will definitely not accept an "ANACS MS-65" coin solely on the basis of the attached grading certificate.)

Another "search for quality" is now also evident across the teletype circuits. At least one anxious bidder is in the market for 1950-67 "deep cameo" proof half dollars---offering to pay "double bid or even more" for pieces which fit this description. (Bid for these issues, of course, appear in each issue of the MONTHLY SUMMARY.) The availability of "deep cameo" proof specimens, by the way, is not in direct proportion to the mintage of the corresponding proof set. Some of the tougher ones to locate are from the later years in which the proof set mintages were relatively high. Unfortunately, it must also be mentioned that some specimens are on the market which have been treated to resemble cameos. Those who do not feel that they are able to tell the difference should have specimens checked by a reliable dealer.

This Week's Market

CENTS: Something of a paradox is currently being presented by the BU Lincoln roll market. First, there aren't many buyers or sellers in evidence at the moment. And the occasional seller (generally within present bid/ask ranges---if the rolls are choice) usually receives little attention. But, on the otherhand, the occasional buyer still has difficulty locating the specific dates he needs---sometimes bidding unsuccessfully for days!

NICKELS: While the Buffalo nickel "short set" rolls have remained steady this past week, some of the wartime Jeffersons haven't fared quite as well. Lower bid/ask levels are in effect for the following dates in this eleven-issue group: 1942-P - $425/$465, 1942-S - $375/$410, 1944-P - $170/$185, 1944-D - $330/$360 and 1944-S - $245/$267. Very light trading continues for this entire series---with a short "want list" being monitored only on scattered occasions.

DIMES: A few more minus signs dot the 1934-45 Mercury group---affecting mostly the MS-65 singles (but not the "full bands" versions---prices for which appear in the MONTHLY SUMMARY). Most of the bidding in this area---as well as among the Roosevelts---is still of the bargain-hunting variety. It should be noted, however, that fewer "bargains" seem available.

A few more relatively minor adjustments will be found here and there across the Uncirculated and Proof type coin charts---see page four.

QUARTERS: Several additional adjustments are noted among the various "types" of this denomination also---most being registered for the more plentiful issues rather than the tougher ones. There is, however, a bit more buyer interest recorded---even though the majority of potential purchasers tend to expect "discounts" (which, as mentioned, are now fewer and further between).

The only changes for the Washington rolls have resulted from the rebound in silver bullion levels. (This, of course, has also caused a similar reaction in the various other "bullion-related" areas.)

HALVES: The common P-mint Walking Liberty rolls have again slipped a bit lower as the search for gem MS-65 single specimens continues to dominate. (Buyers are urged to to check any rolls which may be offered for "sliders", excessively marked or otherwise inferior coins which might find their way into "original" rolls.) The Franklin rolls, too, fall into the same category; check page three for minus signs which have been recorded in this area. It should be added that moderate bidding continues for gem singles in this series as well.

DOLLARS: A pleasant note in this area! Several issues in the Morgan series are sporting plus signs this week---mostly in the MS-65 column, of course. Most, but not all, of the issues involved fall into the "under-$500" category---and these are all dates which seem particularly elusive in gem MS-65 condition at current levels. On the other hand, a few more of the "high ticket" issues have edged a bit lower. (It cannot be repeated too often that strict grading is a MUST!)

The upswing in silver bullion prices has not yet affected bid/ask levels of the BU dollar rolls. Trading, however, has increased a bit.

PROOF SETS and MINT SETS: Numerous minor adjustments have been made across both charts---with moderate trading being registered. The still active 1979-S "type two" proof set continues to change hands within the $140/$152 range; the single Anthony dollar is strong (and rather elusive) at $100 bid.

COMMEMORATIVES: Selling lists have become slightly more frequent on the various teletype circuits---and several more of the silver issues have edged lower in all three uncirculated categories. In contrast, the gold commems are seldom offered---especially in the sought-after gem MS-65 grade.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $341.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE. the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BULLION TRADING LEVELS ON THE UPSWING

Collector Oriented "Want Lists" Begin To Appear More Frequently

The Market in Depth

ALLEN HARRIMAN

As of this writing, both gold and silver bullion remain higher than they were last week at this time---and most of the dealers who handle bullion material in quantity continue to report relatively brisk sales. One dealer in particular remarked that "customers he hadn't heard from in over a year were beginning to call". There are, of course, two schools of thought concerning gold and silver bullion prices---one that we have "already seen the bottom" and another that "new lows will still be seen". However, current trading levels seems to indicate that there are now more people in the first group than at any time since prices fell so dramatically. The hopes are, of course, that bullion will continue to make a firm to strong showing through the summer---and especially through the upcoming A.N.A. Convention.

And another bright note is slowly beginning to be registered. During the past couple of weeks more and more teletype bidders are in the mood to "pay full bid" for the varied material that they need---and not infrequently even a bit more (as evidenced by the light scattering of plus signs which will be found here and there on this week's charts). Naturally the trend over the past many months has often been to "offer less" due to the expectation that bid levels in most areas would continue to be adjusted downward. However, at this point, at least those dealers who are in a healthy cash position (or, who have a few more customers) are not so willing to discount their material. This is not to say that "the rebound" is in process---but it is definitely an encouraging sign.

Current "want lists", by the way, are also becoming more varied---and they are tending to reflect collector and investor needs. Better date coins in numerous series (Indian cents, the Barbers, early Walking Liberty halves, etc.) are wanted in particular grades---and quantities in such areas as Eisenhower dollars, proof sets, mint sets, etc. are being asked for on a somewhat more regular basis. The immediate future depends greatly upon the bullion market, interest rates, the August A.N.A. Convention, and general optimism---so, as they say, we will have to wait and see!

An update on the "type one" and "type two" 1982-S proof Jefferson nickels: these two types are now being discussed over the teletype circuits and the difference lies basically with the lettering on the reverse. Bid for both rolls will certainly remain volatile for weeks to come---so a close watch is recommended. So far, only a few of the proof sets containing the "type two" versions have been delivered (and bid is around $75); a few sales of the earlier "type one" rolls have been recorded around $175.

This Week's Market

CENTS: Again the BU Lincoln rolls show little change---with minor adjustments noted for only 1939-D ($190/$207), 1942-S ($220/$240) and 1943-S ($182/$200). Still, as usual, locating just the right dates in the right condition is not always as easy as it might appear. There are many inferior rolls (spotted, fingerprinted, etc.) on the market.

There are no recorded changes among the various "type" issues this week. It should be mentioned, however, that considerable interest remains evident for the lower grade circ pieces---as well as for better date Indian cents in Good thru Fine condition.

NICKELS: As the enclosed MONTHLY SUMMARY will show, most of the lower grade Liberty nickels have edged higher---in contrast to the lowered levels for the uncirculated specimens. (There is now more interest in gem MS-65 Liberty nickels---but many potential buyers continue to feel that "offering less" might be successful.)

The Buffalo rolls are steady this week; two wartime Jefferson rolls are a bit lower: 1942-P ($425/$465) and 1942-S ($375/$410).

DIMES: One major teletype bidder is now in the market for "common date" P-mint Mercury dime rolls "at bid" ($400); this, of course, is a welcome change from the bargain-hunting of the past several months. It also should be added that few choice rolls have been located at this level. There are, however, several additional minus signs among the pre-1941 rolls and singles (see pages two and three). In the Roosevelt series, the 1955-P and bullion-related rolls have moved a bit higher.

QUARTERS: Several better date Washington rolls have been listed for sale at slightly lower prices this week; buyers in this series aren't numerous---and the ones who are bidding only want specific rolls to fill client needs.

A few more adjustments have been made on the page four type coin charts. In MS-65 uncirculated---Barber quarters ($1000/$1125) and type two "full head" Standing Liberties ($1050/$1175); in proof condition Barber quarters are a bit lower in all three grades.

HALVES: The 1934-40 Walking Liberty singles are firm at current levels---with very few properly graded examples available. (There are, of course, enough "close" pieces which are described as MS-65 to go around.) The W.L. "short set" rolls are also unchanged---with only mild interest noted from time to time. (Buyers are still concentrating on the gem MS-65 singles in this group.)

Prices among the Franklin rolls are mixed. Several of the earlier dates are slightly lower---and several of the post-1954 issues are sporting small gains (apparently the recent lowering of price tags in this group has begun to attract some far-sighted buyers).

DOLLARS: The MS-65 1878-91 Carson City issues are all on the plus side of the ledger this week---with quantities wanted by at least two major buyers. Although most of these dates are easily located in conditions up to and including "MS-63", strict gem MS-65's are really quite elusive. A number of dates (mostly in the "common" group) are somewhat lower in the MS-60 and MS-63 categories.

Bargain-hunting is still the main theme of activity in the Eisenhower series. The 1974-S 40% silver proof, however, has edged forward this week---with "up to one hundred" sets wanted.

PROOF SETS and MINT SETS: Again the 1979-S "type two" proof set has scored an advance; bid is $145 this week---with transactions recorded at that level. Adjustments are minimal across the rest of the dates.

COMMEMORATIVES: Quite a number of price changes will be found on the page two silver commem chart---however, they are mostly in the MS-60 and MS-63 columns. Those dealers who are in the market for commems are strictly quality-conscious---and the majority of the less-than-gem pieces remain on selling lists even after prices have been reduced. True gems are not as easy to find as one might gather from recent price performances.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $345.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BULLION CONTINUES UPSWING; FEWER MINUS SIGNS NOTED

An Examination of Half Cent Thru Three-Cent Price Performances Since Early 1979

The Market in Depth

ALLEN HARRIMAN

In the July 9th issue we examined the price performances turned in during the past 3½ years by the 1936-64 "silver" proof sets. The comments made---and the accompanying price chart---approached the discussion from the "medium term" investment viewpoint rather than dwelling merely upon the more recent drops in price levels from the peak market (which occured as only part of the overall 3½ year picture). In short, that brief study of proof set price history was geared primarily to those who treat their coin investments with much the same attitude as most people see their similar commitments in non-numismatic areas---and not necessarily to those who are inclined to "play the market" with the "short-term" in mind. The gains made by proof sets over that period ranged from (a few) moderate to (most) excellent.

This week we are going to take the same look at the price performances recorded by the first group of type coins (half cents thru three-cent pieces) in gem MS-65 condition. Again, the discussion will cover the same 3½ year period beginning with January of 1979 and ending with the current price levels as they appear in this week's issue.

Frankly---even with all of the statistical information at our fingertips---we were still very surprised (and very pleasantly so) with the actual figure by figure results as they were complied for the chart which follows. The far-thinking investor or collector who purchased coins in this group in a discerning manner by mid-1979 has, at this point, still realized potential profits of impressive proportions by virtually any standards. Obviously, as was mentioned in our article on proof sets, not everyone "bought in" at the same time---thus, again, each individual reader will relate to these figures differently. However, most reliable (and realistic) dealers usually urge clients to think of their purchases in at least a three to five year time frame. So, for those who "held on" to their gem MS-65 type coins rather than having sold around the peak---or sometimes since---the final "percentage gain" column will still appear very attractive in spite of the market's major price adjustments over the past couple of years.

ISSUE	1/5/79	6/29/79	1/4/80	6/27/80	1/2/81	6/26/81	1/8/82	Current	3½ Yr. GAIN
Half Cents - Draped Bust	$ 875	$ 900	$ 1750	$ 3250	$ 3900	$ 3900	$ 3900	$ 2700	208%
Half Cents - Classic	550	550	900	1750	2000	2000	2100	1700	209%
Half Cents - Braided	530	550	900	1750	2000	2000	2200	1800	239%
Large Cents - Draped Bust	6000	6500	10,000	15,000	16,500	15,000	15,000	8500	41%
Large Cents - Classic	7500	8000	12,500	18,000	22,500	20,000	20,000	15,000	100%
Large Cents - Coronet	700	700	875	1600	1800	2000	2100	1800	157%
Large Cents - Braided	510	525	750	1400	1600	1700	1850	1700	233%
Flying Eagle Cents	450	625	1000	1500	1500	1500	1800	1400	211%
Copper-Nickel Cents - 1859	450	525	950	1200	1350	1250	1400	1300	188%
Copper-Nickel Cents - 1860-64	125	190	300	600	800	750	785	540	332%
Indian Head Cents	42	66	90	400	390	300	300	225	435%
Two-Cent Pieces	275	275	600	875	1075	1250	1350	1100	300%
Three-Cent Pieces - Nickel	140	230	575	1200	1100	800	825	600	328%
Three-Cent Pieces - Silver (I & III)	350	550	1400	2700	2200	2000	2100	1700	385%
Three-Cent Pieces - Silver (II)	700	1100	2300	4250	3750	3250	3200	2000	185%

When reviewing the above chart, it is important to note an apparent paradox which most "strictly grading" dealers are currently facing. This is the current lack of truly gem MS-65 coins which confronts those who are in need of such genuinely top quality material for their present clients. It is obvious that those who were in an overall selling mood in months past are either now "out of stock"---or have finally decided to "hold on" for the next upswing rather than sell at what many feel is the "bottom" (or, at least, very close). Dealer after dealer has recently commented that they are able to find only very scattered specimens which fit their requirements at today's bid levels. (Of course, the supply of "almost there" coins is still more than adequate.) There is, however, as yet a general reluctance to raise bid levels---but if the very "thin" supply of true MS-65's continues (as it appears it will), it is amost certainly now going to take higher bid levels to produce reasonably substantial results. Such advances, should they come, will no doubt be of a "cautious" nature---but already we are receiving reports from "specialist" dealers of actual sales of specific coins at "ask" or, sometimes, notably above.

This Week's Market

The most significant thing about this week's price charts (in all areas) is the general lack of minus signs in comparison to the majority of those CDN issues readers have received during the past months. And the scattering of plus signs here and there also add a welcome change. This doesn't mean that all "bargain offerings" have disappeared---but they are now fewer and more often in the less desirable "lot price" category. Continued improvement in the bullion market, of course, is at least partially responsible for this week's more "firm" market. But other factors as well enter into the equation---among them the more frequently heard opinion that the "bottom" of the market has already been seen---or soon will be. This remains to be seen, however. A new slump in bullion prices, for instance, could quickly cast another shadow. The next few weeks (including the A.N.A. Convention activity) are very important ones!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $355.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

GEM "TYPE" NOW ELUSIVE IN SPITE OF SLOW MARKET

Silver Commems Reflect Numerous Lower Prices; Sellers Dominate Current Activity

The Market in Depth

ALLEN HARRIMAN

As one of the country's largest dealers recently expressed it, "This time it's true." He was referring to the complaint heard over and over through the years in the coin market "that there are no gem type coins available". He went on to explain that even though this lament has been put forth many times in the past (most recently around the peak market of early 1980) there had really always previously been a supply of coins entering the pipeline from various sources. The difference this time seems to basically spring from the fact that very, very few holders of this quality material are in the selling mood now. After all, if an investor or collector has held on this long, wouldn't it seem somewhat foolish to let go now. Though certainly not definite at this point, the market does show signs of "bottoming" in some areas ("type" and gold, for instance). Enter into this equation another fact: very, very few buyers are yet in the mood to raise bid levels for the material they are complaining they can't locate. Now you have a simplified picture of the type coin market as it currently stands.

This "no gem coins available" complaint actually isn't completely true, even this time, in the strictest sense of the word. Now and then a top quality coin or two can be "picked off" (and occasionally at a very reasonable price) from a dealer who needs to raise some money---or from some other source (such as an estate, a poorly attended auction or other widely spaced situations). However, it is certainly true when viewed from the standpoint of a solvent dealer who has numerous client orders to fill. An occasional gem Seated Liberty dime, for example, might still make an appearance (and at a bargain price)---but, if a buyer decided that he wanted even just ten specimens, he would find it a difficult and time consuming task to locate them. There are at least a few dealers who are facing this problem. They could use small quantities of numerous "types" (especially the lower priced issues) and the usual supply of material coming in "over the counter" or from private sources simply has "dried up". It should be added that the dealer mentioned at the beginning also added that he "did not expect" another wild upsurge of prices such as was experienced a couple of years ago to result from this shortage of coins---but rather a more orderly and considered advance "when the time comes".

The upcoming auctions (whether geared to coincide with the A.N.A. Convention in Boston---or actually part of it) will definitely be a barometer for the coming months. In line with the above comments, it should also be noted that consignments of top grade coins to these auctions were much harder to get this year than at any time in recent history. This, of course, for the reasons already discussed. The "weaker" hands have sold by now---and the "stronger" ones would rather add to their holdings than part with their present inventory. A couple of factors which will influence these several upcoming auction sessions are: lack of large amounts of available buying capital (in contrast to the "golden days") and the tightened grading standards which apply even more strictly during the "down" cycles of the market. Many coins which would grade MS-63+ (at best) on today's market would be bought and resold at a profit as MS-65's within an hour or two during the "heat" of 1979-early '80. Today's buyers are much more cautious---and demanding; a coin which is "close" will almost certainly be passed over by any knowledgeable buyer. With a limited amount to spend---and facing static price levels---taking time to carefully inspect and consider each purchase is now the rule rather than the exception. Thus, potential bidders at these August auctions are more likely to examine the lots thoroughly---and to bid on only those pieces which are "all there". The prices realized, of course, will have to be weighed in light of this fact. Many gem coins are included in these sales; the results will be trendsetting.

A final note: though the above thoughts were spurred by the conversation with the particular dealer mentioned, similar comments have been expressed to us---and with increasing frequency----by numerous dealers. This is by no means a limited phenomenon even though it may not affect other dealers whose main thrust of market activity lies in other areas.

This Week's Market

CENTS: Trading among the BU Lincoln rolls remains mostly limited to the occasional buying message seeking a couple of specific dates in gem condition. Issues not on current "want lists" usually fail to attract a buyer---even if the price is lowered (as a few more were this week).

Several price levels have also been reduced in the area of "type": Braided Hair large cents - $1500/$1675, Flying Eagle cents - $1250/$1400 and 1859 Copper-nickel cents - $1250/$1400. These are MS-65 prices, of course---see page four for adjustments in the MS-60 and MS-63 categories.

NICKELS: Only one change has been noted in the Buffalo nickel "short set" group; the 1935-S is now in a slightly lower $2000/$2175 range. Four of the earlier Jefferson rolls have followed suit: 1939-D - also $2000/$2175, 1939-S - $1400/$1525, 1940 D & S - both $90/$97, 1941-D - $135/$146 and 1941-S - $190/$207. Some below-market bidding is being recorded among the various other dates in this series---with little success noted. (somewhat inferior rolls are often produced by bargain-hunting; gem rolls seldom appear.)

Several buyers are interested in "middle grade" (usually VF or XF) Liberty and Buffalo nickels. Some buying lists are obviously of the "store stock" variety (these generally include virtually all dates in a series) and others are designed to fill particular customer needs. It is actually quite difficult to locate any quantities in these grades---particularly in the Liberty series.

DIMES: No changes have been made in the 1934-45 Mercury group this week. There are, however, a couple of dealers who are asking for "quotes" (on several dates) rather than pinpointing price tags. There are a number of potential buyers beginning to ask for pre-1954 Roosevelt dime rolls; thus far, however, the majority seem content to wait for the bargains. (One exception, the 1948-P roll is slightly higher---and apparently rather elusive at the moment.)

A few minor adjustments appear on the type coin charts---including an advance (to $4750) for the very tough 1873-74 "arrows" Seated Liberty.

QUARTERS: Quite a number of Washington rolls (from 1942 thru 1953) have been included on teletype selling messages this week---several at lower levels. These reduced prices, however, haven't yet enticed many buyers. (As in the Jefferson and Roosevelt series, there is scattered bargain-hunting evident---with a few specific issues wanted in quantity.)

HALVES: One major bidder continues to "offer bid" for all of the 1934-47 Walking Liberty singles. Strict grading, of course, is a must---and all pieces received which do not fully measure up are returned. There is certainly more than enough "close" specimens on the market---but true gems are usually located one or two at a time. Three Franklin rolls have slipped back a bit: 1951-D - $1200/$1300, 1951-S - $700/$760 and 1952-S - $750/$815. As in the Walking Liberty series, "typical" BU rolls are of little interest---only top quality singles attract much attention at the moment.

DOLLARS: A moderate number of changes---in both directions---will be found on the page six charts. Several dealers are in the market for quantities of "BU" Carson City dollars---with gains noted for the 1878, 1884, 1890 and 1891 issues in the MS-60 column. Several plus signs also appear in the MS-65 prooflike column (remember, prices in this column are bid ranges---not bid/ask levels). It should also be pointed out once again that at least two frequent bidders will pay over bid for relatively lengthy lists of MS-65 specimens in both series---as long as they fit the exacting requirements.

See page four for the changes which have been registered this week for proof-65 "type" dollars.

PROOF SETS and MINT SETS: The 1939-42 proof sets have edged lower this week. Although the number of sets being offered isn't great, those which are available tend to remain on selling lists. (An occasional lower offer is probably designed to pry loose a set or two "for a little less".) The usual adjustments have been noted for several of the other issues---some slightly higher, some a bit lower.

COMMEMORATIVES: Another extensive rash of minus signs pepper the silver commem chart---affecting about half of the issues in MS-60, MS-63 as well as MS-65 condition. Two or three dealers are running frequent selling messages---with little result. Silver commems (as those who have watched them for any period of time will know) have long reflected relatively major swings in price levels---and usually over shorter periods of time than most other segments of the market. This will be an interesting area to keep an eye on.

U.S GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $352.50 per ounce

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

SILVER COMMEMS REFLECT STILL LOWER PRICES

An Examination of Nickel and Half Dime Price Performances Since Early 1979

The Market in Depth

ALLEN HARRIMAN

Over the past few weeks we have taken a statistical look at the price performances that have been registered over a 3½ year period (beginning January, 1979) by the 1936-64 proof sets---and by the half-cent thru three-cent type coins. In continuation, this week we are reviewing the figures for all five-cent pieces (nickel and silver) for the same period of time. As was shown earlier, the 3½ year percentage gains in these studies (considered here as "medium term" investments) proved to be quite substantial by virtually any standards. And this after the major price adjustments of the past eighteen months or so have been figured into the equation. Here are the figures for the Shield nickels thru Seated Liberty half-dimes:

ISSUE	1/5/79	6/29/79	1/4/80	6/27/80	1/2/81	6/26/81	1/8/82	CURRENT	% GAIN
Shield Nickels (w/rays)	$ 775	$ 950	$ 1,800	$ 3,150	$ 3,000	$ 2,700	$ 2,800	$ 2,000	158%
Shield Nickels (no rays)	175	300	725	1,600	1,350	1,100	1,120	750	325%
Liberty Nickels (no cents)	40	45	300	825	700	500	300	250	525%
Liberty Nickels (w/cents)	125	210	500	1,150	1,000	800	700	540	332%
Buffalo Nickels (Type I)	40	47	150	400	400	340	180	110	175%
Half Dimes - Fl. Hair (1794-95)	8,500	10,000	17,500	27,500	25,000	20,000	17,500	15,000	76%
Half Dimes - Dr. Bust (1796-97)	10,000	12,000	27,500	39,000	35,000	25,000	25,000	20,000	100%
Half Dimes - Dr. Bust (1800-05)	9,250	11,000	21,500	31,500	30,000	22,500	22,500	18,500	100%
Bust Half Dimes	600	825	2,100	4,250	4,000	4,000	4,250	2,700	350%
S.L. Half Dimes (no stars)	900	1,150	3,000	6,000	5,000	3,800	4,500	3,000	233%
S.L. Half Dimes (no drapery)	600	775	2,100	4,000	3,500	2,800	2,700	1,700	183%
S.L. Half Dimes (stars obv.)	450	675	1,800	3,650	3,000	2,600	2,150	1,450	222%
S.L. Half Dimes (arrows)	550	750	1,900	3,750	3,250	2,700	2,500	1,600	190%
S.L. Half Dimes (legend obv.)	325	500	1,400	2,500	2,200	2,000	1,800	1,200	269%

As can quickly be seen, the advances in this fourteen coin group also fall into the "impressive" category---with even stronger terminology certainly appropriate in several cases. Again it must be pointed out that all buyers, of course, did not purchase their coins simultaneously---nor did everyone "hold on" throughout the period covered; nonetheless, the above figures show clearly that more recent market conditions have far from nullified the gains expected (or hoped for) around this particular time of purchase. In fact, if the majority of these early buyers had been questioned about their expectations, probably very few would have expressed an outlook in excess of these final figures! (In future issues we will continue this examination thru the remainder of the "type" line-up.)

☆

The silver commemoratives continue to suffer from a lack of buyers to counteract the selling mood currently prevalent in the market. Not only are relatively lengthy teletype lists being noted on a daily basis---but, in addition, numerous dealers are reporting very slow sales at shows and thru various selling lists. One major mid-Western dealer, for instance, recently reported purchase of "large hoard" of choice and gem original commems (at a substantial "discount") and a subsequent only partially successful attempt to re-sell. He began listing these (a large number of different issues) at "ask", then "bid"---and finally at a "percentage off". Some---but not yet all---have been sold. This week's price chart continues to tell the story.

As was briefly mentioned last week, such relatively violent swings in silver commem prices are not particularly unusual. Similar major downward swings in the past (especially if prolonged) have sometimes preceeded a strong price move in the opposite direction. Whether this proves to be the case this time, of course, remains to be seen. The general market climate after the up-coming A.N.A. Convention---and during the next few months---will definitely have an influence on this as well as all other areas of the market.

This Week's Market

CENTS: Another scattering of minus signs will be found among the lightly trading BU Lincoln rolls. Surprisingly, however, when a bidder needs a particular roll or two, it often takes a long while to make the purchase.

☆

NICKELS: Lower bid/ask prices are noted for five of the Buffalo "short set" rolls: 1935-P - $1400/$1525, 1935-S - $1900/$2075, 1936-P - $900/$975, 1936-D - $1300/1400 and 1936-S - $1500/$1625. Also again on the lower side of the ledger are most of the 1939-44 Jefferson rolls; see pages two and three.

DIMES: Available at reduced levels this week are the 1934-38 Mercury singles. These prices are not for "full bands" specimens (which will be found in next week's August MONTHLY SUMMARY). A few sales of choice "common date" P-mint Mercury rolls have been noted at $400. Two gains have been registered by the Roosevelts: 1948-P - $180/$195 and 1955-P - $65/$70. Losses recorded for the later dates are due to lower silver bullion prices.

QUARTERS: A few adjustments have been made among the more "basic" Seated Liberty quarter type coins---in MS-60, MS-63 as well as MS-65 condition; check page four. With one exception (1954-S), the only minus signs noted on the Washington roll chart are also related to silver bullion levels.

HALVES: the 1934-47 Walking Liberties are unchanged this week---with at least one major bidder still in the market for gem MS-65 singles. A few changes---in both directions---have been noted this week for the Franklin rolls: trading remains light (although bag quantities of the later dates are now wanted).

DOLLARS: The out-of-favor MS-60's in both series are suffering another rather extensive rush of minus signs. It should be remembered that the only technical qualification needed for a coin to fit the MS-60 category is that it not be circulated. (MS-60 is one point away from being a circulated coin.)

Interest in BU rolls appears to be on the upswing---with several bidders now actively seeking large quantities (at current bid levels).

PROOF SETS and MINT SETS: Only the usual minor adustments will be found in these areas; moderate trading continues. The 1979-S "type two" proof set is being offered in a $130/$140 range; trading is now relatively light.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $335.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

NEW FORMAT INTRODUCED FOR SILVER DOLLAR PRICES

Market Coverage Expanded to Include Column for "MS-63 Prooflike" Morgans

The Market in Depth

ALLEN HARRIMAN

Major changes in our regular weekly format will be immediately apparent to readers this week---particularly those who have special interest in silver dollars. Moving the expanded coverage of circulated thru MS-63 dollars to page four---and the MS-65 and prooflike issues to page five---will facilitate reference to bid/ask ranges for all grades in both series. Reading from left to right, subscribers will now be able to more quickly review the prices for each date in every grade without turning pages. ("Type" will now be found on page six.)

And the new column covering MS-63 prooflikes should certainly prove to be a popular addition! Actually, when located in full prooflike condition, more Morangs fall into the MS-63 category than into the much scarcer (and thus much higher priced) MS-65 category. This latest addition to the CDN pricing charts continues our policy of the most comprehensive market coverage available---and we are certain that a major number of readers will find it very useful.

We would also like to point out some newly added grade and quality references. Most important are the grade descriptions for MS-60 thru MS-65 "regular surface" and prooflike dollars. These descriptions appear at the bottom of the page four and five price charts. A thorough reading is recommended. The bid/ask levels in the price columns correspond to these descriptions; not always to the grade descriptions attached to every coin offered across the teletype circuits or found on various buying and selling lists. For example: an offer to buy "only nice MS-60's" at the MS-60 ask price does not mean that the MS-60 bid should advance. A MS-60 coin can hardly be termed "nice" since it is technically only one point away from being a circulated coin. The "nice MS-60" is obviously at least "on it's way" to being MS-63. The MS-60 price column is for MS-60's! To repeat, we suggest that subscribers check these descriptions.

In addition to those for MS-60 thru MS-65 prooflike, readers will note that we have included a description for the unpriced (and very elusive) "superb" MS-67's. Perhaps this one warrants further comments. As stated, true MS-67 examples of all dates are at least "very elusive"; several dates are extremely rare or not actually known in this condition---with most others encountered on only widely scattered occasions. Each specimen---if and when encountered---trades at a price based upon the merits of the particular piece (and, often, upon the circumstances of the moment). For instance, there is a "standing" buy offer of "at least $250" for any date which fully meets the MS-67 requirements. This bid is obviously aimed at the 1878-82 S-mints (the "easiest dates" in this grade). But, at auctions, even these "common MS-67's" have realized as much as $800! With such a variation in prices for dates which are relatively "easy", pinpointing specific bid/ask ranges for any issue is definitely impractical. Such listings would be meaningless (at best)---and they could also be very misleading. It is doubtful if many people who own such top quality dollars are unaware of these facts---and the vast majority of transactions in this rarified area are almost certainly undertaken with these facts in mind.

A few additional comments on silver dollars:

Definitely increased buyer interest in BU dollar rolls has become evident over the past couple of weeks. Several dealers are now "in the market"---and virtually all are stipulating "nice rolls only". In line with this buyer qualification, see the notation at the top of the BU rolls chart (page five). Today's buyers will seldom accept rolls of "overall low quality" at bid levels; if they take them at all, it will be at a substantial discount. This basically means those rolls which have been assembled from "left overs" (the worse dollars in a bag or those remaining from picked-over lots). To be acceptable today (within bid/ask ranges), a roll must be more or less of at least MS-60+/63 quality. Those who are putting rolls away for the medium to long term should remember this.

About "split-grade" coins: With the advent of ANACS grading, the number of coins carrying split-grade descriptions has been dramatically increased. Though split-grades come in all combinations---MS-60/63, MS-63/60, etc.---those about which we receive the most questions are the ones which are graded either MS-63/65 or MS-65/63. The meaning of this description, of course, is that one side of the coin is a grade better than the other. (The obverse grade appears first.) In the "old days", coins were generally graded in relation to the worse side. The logical thinking was that if even the majority of detracting features fell on one or the other side, the coin (as a single entity) was no better than the lower grade side. And even now, in spite of split-grade descriptions, there are very few buying dealers who place a premium over the lower grade on such coins. We can't recall ever seeing a dealer buying list actually asking for split-grade pieces. Selling dealers, however, have now been placed in the position of owning many such coins---and, of course, it is not illogical that at least a percentage would be listed for sale at premiums. The main thing to remember is that when it comes time to sell, a collector or investor will almost certainly be faced with this problem..

This Week's Market

A minimum of price changes in all areas have been registered this week. This is due at least in part to the fact that so many dealers have been spending time in preparation for the now in progress ANA Convention in Boston. Many left their shops and offices early in order to work in a "little vaction"---and many others used the days preceeding the convention to ready their merchandise for bourse tables. Thus, normal trading patterns were somewhat interrupted---and price levels remained more or less static.

Then, too, a "wait and see" attitude is usually apparent each year around ANA time---waiting to see if particular coins might be sold at the show---waiting to see if any price trends developes---waiting for auction results, etc. This year is no exception. In fact, this year is an important one in respect to what overall trends, if any, result from the activity in Boston. These results will certainly have an effect on market climate for at least the next several months.

As has been mentioned previously, of particular interest will be the results of the ANA Auction as well as auctions timed to attract the same (hopefully) large number of bidders. Many scarce and rare coins---as well as many gem examples of less scarce issues---are being offered. The CDN plans to present an analysis of these auctions in the near future.

U.S. GOLD (Prices ara for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $338.30 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Any quality, but with contact marks, hairlines, scratches or other evidence of handling. However, no further quality criteria are mentioned. Coins with heavy marks, nicks or weakly struck areas may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics as the MS-65--but with the additional feature of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck--and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chert are for "typical" coins. These usually average MS-63--but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

A.N.A. CONVENTION BEGINS AND ENDS ON UP-BEAT NOTE

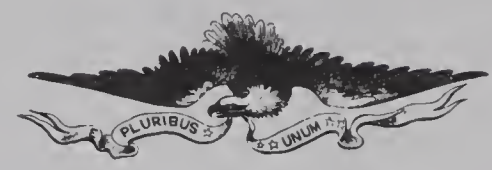
Gold Bullion Tops $400 Mark—Silver Trades Over $8!

The Market in Depth

ALLEN HARRIMAN

Smiling faces were the rule rather than the exception at the just concluded 1982 A.N.A. Convention in Boston! This is in direct contrast to the general attitude seen at virtually any show during the last year or more. One of the most frequently heard comments was that the show was "much, much better than expected". Activity began on a strong note at the opening bell---and, contrary to the recent tendency, the level of buying and selling remained relatively high throughout the entire week. It was obvious that most attending dealers were, at least, somewhat apprehensive about this year's convention; others were "downright pessimistic". Such attitudes, of course, seemed well founded in view of general market conditions prevailing over the past many months. But a number of factors coming together simultaneously quickly altered these attitudes---and, as most dealers expressed it, "my best show in at least a year". Among these contributing factors: rapidly falling interest rates, a sudden and major surge in bullion levels, a genuine scarcity of top quality material in most dealer's inventories and, importantly, a readiness on the part of dealers to see the "brighter side". (Optimism spreads as quickly as does pessimism---if the timing is right.)

Now, lest we paint too rosy a picture, it should be pointed out that "bargain hunting" still remained quite evident---and much of the buying was judiciously handled. Nor did every area of the market enjoy an equal amount of activity. Off quality coins were generally of little interest unless the "price was right". Dealers searched for the elusive gems and there were counter-offers for top quality pieces even when they were encountered. And, "price resistance" quickly became a consideration for many coins priced over $3000 to $5000. Still, there were many very impressive prices paid on the bourse floor which proved to be exceptions to this general tendency---and at "Auction '82" (August 13-14) and at the actual A.N.A. Auction conducted during the show.



The following is an abbreviated list of some of the prices realized at auction. (A much more thorough examination of this year's auctions will appear in the next issue of the MONTHLY SUMMARY.)

An 1859 half dime described as MS-67 sold for $3410; an 1829 "small size" Bust dime in the same grade brought $12,100 (!) and another in MS-67 dated 1830 went for $8800. Still in the superb MS-67 category; an 1860 Seated Liberty dime brought $1650. The rare 1876-CC twenty-cent piece in XF condition sold for $25,000. Among the highlights in the quarters was the MS-65 1862 at $2420, an 1864 described as superb gem BU at $3800, the MS-67 1870 at $3300, the 1880 (also MS-67) at $3740 and a "gem BU" 1883 which brought $2600.

Half dollars: 1838-O in "choice proof" condition (all descriptions are from the catalogs) brought $47,500; an 1866 Seated Liberty (with motto version) reached $4620 and a MS-65 1942-P brought $192. Amont the silver dollars: 1799 "gem BU" at $26,000; 1852 Seated Liberty "gem proof" - $14,000; 1886 Morgan "superb gem proof" - $3000; 1897-S Morgan "MS-67" - $1815 (!) and an 1881 Trade Dollar in "proof-65" - $3410.

A few prices for gold: the tough 1824 $5 (called gem BU) brought $32,000 and an 1828 $5 described similarly sold for $40,000. An 1854-D $3 gold piecc in XF condition fetched $11,500---and a "superb gem proof" 1913 $2½ Indian reached $10,000. Some strong prices were also realized by the impressive group of Territorial gold which was offered: a "superb gem BU" 1854 Kellogg $20 sold for $28,000---and another example described as "proof-65" brought $63,800! A Miner's Bank (undated) $10 was knocked down at $24,000.

As mentioned above, one of the factors contributing to the "pleasantly surprising" and generally up-beat nature of this year's A.N.A. was the happy coincidence of a strong rally of bullion prices at just the right time. Bullion dealers have reported "heavy buying" throughout the week---with a scarcity of certain denominations developing quickly. One major trader remarked that sales of St. Gaudens $20's was sluggish at best when gold was pegged around $325 or so---and that now he is finding it difficult to locate enough coins to fill the quantity orders which are being received! The gold chart at the bottom of this page will tell the story.

This Week's Market

Naturally, with a large percentage of dealers away from their teletype stations during the past week, activity was somewhat diminished. Still, a scattering of plus signs will be noted here and there across the various charts---and not all of them are of the bullion-related variety. The next few weeks should certainly be interesting ones---especially with a relatively large number of encouraged dealers returning to their shops or offices.

Among those areas which continued to receive teletype attention during the past week were scattered BU rolls---examples: 1942-S Lincolns---1948-P and 1955-PDS Roosevelts---1955-D Washingtons and a number of Franklin issues. (In this latter group it should also be pointed out that bag quantities of virtually all issues from 1957 thru 1963 now regularly appear on dealer "want lists".) And a quick glance at the page five BU dollar rolls chart will show a major advance for most of the common "P" and "O" mints. Again, quantities of "nice" rolls are wanted. In line with this qualification, it is suggested that subscribers re-read the notation at the top of this particular chart. Rolls of overall low quality are not what current buyers want---and put-together rolls poor quality rolls are usually returned to the sender.

Silver commemoratives remain in a relatively weak position---and they have been joined this week by some of the gold issues. Most of the sales in this area at the A.N.A. were of the "bargain lot" variety---with only a few widely scattered single sales being noted at "full ticket" levels. This week's chart reflects several more lower prices---this time affecting mostly the higher priced singles and PDS sets.

Several changes will also be found on the page six type coin charts---changes about evenly divided between gains and losscs. Thcse adjustments, of course, are based upon actual transactions in Boston---and further changes will be forthcoming as more data is analyzed. The already mentioned "price rcsistancc" factor definitely is a consideration in this area---and, hopefully, the adjustments over the next couple of weeks will see the beginning of a more stablized and positive markct. Time will tell!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $400.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE. the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter, inc.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (EXTREMELY FINE) Will show overall even wear on the high points of the design. Moreover, some of the minor details are completely worn away, but many will remain clear.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chercteristics as the MS-65--but with the additional feature of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They rangefrom very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

INCREASED BIDDING NOTED IN SEVERAL AREAS

BU Dollar Rolls Wanted in Quantity; Eisenhower Issues Begin to Stir

The Market in Depth

ALLEN HARRIMAN

Except for those few who added a little vacation time to their A.N.A. Convention excursion to Boston, most dealers are now back at their teletype stations---and, in many cases, they are more actively trying to buy than at anytime in the recent past. These latest "want lists" vary considerably---and bargain-hunting certainly remains in evidence. However, a number of plus signs will again this week be found scattered here and there across some of the charts.

One of the "warmest" areas is BU dollar rolls. There are numerous anxious buyers---and several are in the market for up to multi-bag quantities. A number of the most common dates have registered gains. And, it should be added, there are at least a few potential buyers who are stating that they will pay "$10 to $25 over bid" for the right rolls of virtually all issues included on the page five chart. It might also again be emphasized that "scruffy" rolls are not wanted at these levels---even if all the coins are "technically" uncirculated.

And among the type coins there is a noticeable increase in bidding. A few more plus signs will be noted---but, not surprisingly, the majority of current bidders are "taking it easy" by generally offering "bid" (or a bit less). By the way, interest is more frequently seen for MS-60 and MS-63 specimens. Price levels, of course, in these two categories have now reached levels which are of interest to more far-thinking buyers. It is interesting, also, to see how few coins are being offered to today's bidders. One would expect a relatively large number of coins to appear as a result of increased bidding---but not so! Most dealers' stocks are severely depleted (particularly of gem material)---and at least a percentage are now in more of a buying mood.

Several of the "popular" issues in various categories are also getting into the act. This includes such low mintage BU rolls as 1955-S Lincolns, the 1955-PDS Roosevelts, 1955-D Washingtons and several of the Franklin rolls dated after 1953---with a sudden emphasis upon the 1954-P. Quantities of each are wanted. And the 1948-P Roosevelt roll continues to advance; several bidders now want this one---and one or two dealers are willing this week to pay as much as $225. It is actually rather surprising how elusive much of this material is when one considers that "bargain priced" groups of these very same issues remained on selling lists only a short time ago.

A further area of interest is centered around the 40% BU and proof Eisenhower dollars. Bidders are also in the market for "up to five hundred" of each of the eight issues involved---and, again, they are not having an easy time locating this "plentiful" material. The "key" 1973-S proof version, by the way, has advanced to $63 bid (up $5) ---and one buyer is already offering to pay $65 to fill a particular order.

This Week's Market

CENTS: A few adjustments (to the lower side) have been registered by the most common two later "type" large cents in circulated condition---see page six. Trading among the BU Lincoln rolls remains light and sporadic. However, new buying lists have begun to appear for most of the 1909-33 singles in strictly gem MS-65 condition---with few if any specimens having been located thus far.

NICKELS: As with the Lincolns, bidding among the Buffalo and Jefferson rolls is still limited to attempts to purchase specific dates to fill client orders. There is some interest noted for the 1938-D Buffalo roll at the current bid of $600---with a few transactions noted at that level.

In "type", true gem MS-65 Liberty nickels are elusive at $550 bid. (However, there is a plentiful supply of "almost there" pieces.)

DIMES: The 1934-40 Mercury rolls have suffered a new rash of minus signs. There are now scattered bidders looking for choice original Mercury rolls---but they are basically concentrating on the 1941-45 issues. A few plus signs will be found on the Roosevelt chart---check page three.

In "type", the Seated Liberty dime (legend obverse) is wanted at a higher $875 (MS-65, of course) and Barber dimes in the same condition are now appearing on at least one regular "want list" at $650.

QUARTERS: As in the other denominations, there is at least mild buyer interest noted for some of the most basic quarter types---Seated Liberty and Barber---in all uncirculated and proof grades. Bids remain at current levels except for a small gain recorded by the proof-65 Barber issue.

With the exception of the 1955-D, sales among the Washington rolls are limited to a few specific dates now and then. However, it is not always a simple matter to find just the dates needed.

HALVES: Several of the 1941-47 "short set" Walking Liberty rolls have been listed for sale at reduced levels this week. It must be remembered that these bid/ask prices are for "typical, original rolls"; bids for gem MS-65 singles remain at the levels reported in the August MONTHLY SUMMARY. A quick glance at the page three chart will show several gains for the Franklins; quantities of many of the 1954-63 rolls are wanted.

DOLLARS: A number of advances have been recorded among the MS-65 gem singles this week---in both series. There are at least three or four strong buyers---and they know the quality that they are after. "Close" will not do! (It might be advisable to re-read the grade descriptions at the bottom of pages four and five. The CDN prices are based upon these descriptions; strike is definitely a major factor.) There is a considerable amount of buyer interest in "nice" BU dollar rolls also; see comments in "The Market in Depth".

PROOF SETS and MINT SETS: Numerous minor adjustments have been made on both charts. Trading is relatively active (especially among the later, lower priced sets) and, as usual, bargain hunters abound. Finding any quantity of sets at "below market" prices is getting to be more and more of a problem---even in "mixed lot" sales. The 1979-S "type two" set is still strong---this week at $145/$155.

COMMEMORATIVES: The silver issues are virtually unchanged this week. A few dealers continue to offer many issues with the recently lowered bid/ask ranges---but sales are minimal at best.

Several changes, on the otherhand, have been noted for the gold issues---some appearing in each of the three uncirculated columns.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $410.30 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) A coin so struck and showing no evidence of rubbing or friction. However, no further qualifications are necessary. A coin bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

SILVER & GOLD BULLION CONTINUE MAJOR UPWARD SURGE

Strong Trading for Bullion-Related Material; Other Areas Also Respond

The Market in Depth

ALLEN HARRIMAN

Soaring silver and gold bullion levels have created, as one major trader remarked, "near panic trading" in bullion-related areas. A quick glance at this week's charts will show to what extent these areas have been affected so far. This sudden and quite impressive upswing, not surprisingly, has also had a definite and positive psychological affect upon the attitude of a majority of dealers---and investors. New "want lists" are beginning to appear covering a number of varied areas from gem MS-65 early Lincolns thru the Eisenhower dollars---from the more plentiful type coins in the higher circ grades thru MS-65. The higher priced type coins and "dated" pieces in the various series, however, have not enjoyed this attention. Indeed, a look at the page six charts will reveal major downward adjustments for virtually all of the early type material in all circ grades as well as some in the MS-60 and MS-63 categories. These changes are the result of compilations and analyses of recent A.N.A. activity. A complete analysis of the August auctions, by the way, will appear in the upcoming September issue of the MONTHLY SUMMARY.

Several subscribers have written during recent weeks with questions about the differences between the two types of 1982-S proof Jefferson nickels. The following information should help distinguish one from the other. A new master hub for the reverse of the proof nickel was put into service during the Spring of '82---resulting in "type one" and "type two" coins. Basically, the difference between the two is in the sharpness of detail---the "type two", obviously, being the sharper. Specifically, the details across the top of Monticello should be examined. The spindle rails around the entire roof line of the building are quite indistinct (if visible at all) on the "type one" version; these rails can easily be seen on the "type two". In addition, the details on the dome of the builing exhibit the same weakness and sharpness according to which master hub was responsible for the die. One further characteristic: the "A" in the word STATES is short on the "type one" coin---and tall on the "type two". Having an example of each type side by side, of course, would be the best way to use the above information.

And, along these same lines, two or three teletype dealers have begun to actively "make a market" in 1981-S "type one" and "type two" proof sets and proof singles. The difference between these two types lies (as with the 1979's) with the mintmark. The "type one" has a closed "S"---while the "type two" is wide open. The "openness" of the second type leaves plenty of room for the proof surface to be seen within the loops of the "S"; the first closed version appears to be "clogged". At least one bidder will already pay $90 for the "type two" set; the halves alone are receiving bids of $20---and the dollars are wanted at $40. Bidding for the smaller denominations have, thus far, been difficult to pin down. Naturally, if trading in these two types continues at the current rate, they will be added to the appropriate charts.

This Week's Market

CENTS: The lower grade circ 1793 half cents---along with the higher grade wreath large cents---have been adjusted to lower levels this week. Gains are noted for the Classic large cents in VF and XF condition. Otherwise, both auction and bourse floor activity at the recently concluded A.N.A. Convention have left bid/ask levels for the "coppers" more or less intact.

NICKELS: Four of the Buffalo "short set" rolls are lower---the new bid levels: 1934-P - $2700, 1934-D - $5000, 1935-D - $3500 and 1935-S $1800. Bidders in this area continue to seek the "type" rolls (particularly 1938-D—which is often of exceptional quality). In the still quiet Jefferson group, the 1950-D and 1979-S "type two" rolls have edged a bit lower.

Among the type coins, most of the earlier half dimes have also been adjusted downward in the circ grades---again as a result of A.N.A. trading. A few changes will also be found on the uncirculated chart (including advances for Bust half dimes in gem MS-65 condition---and both Shield and Liberty nickels in proof-65).

DIMES: The 1934-38 Mercuries which are listed as "singles" on the page two chart are all lower again this week. These bid/ask levels, of course, are for MS-65's---but not for "full bands" specimens. (Prices for FB's appear in each MONTHLY SUMMARY issue.) A considerable amount of bidding is now being noted in the Roosevelt series; the bullion-related issues, obviously, are higher---but there are buyers at current levels for a number of the earlier dates.

Changes similar to those for the half dimes have been registered for the Draped Bust dimes in all circ grades as well as MS-60. Strictly gem MS-65 Barber dimes are higher at $675 bid.

QUARTERS: Rather surprisingly---in view of rapidly escalating silver bullion prices---several of the 1941-52 Washington rolls have been listed for sale at reduced levels. Actually, the quantities available are small---but buyers are directing their attention elsewhere and sales have been light. Bullion-related rolls, of course, are all carrying plus signs.

Following the lead set by the smaller denominations, both Draped Bust quarter "types" have moved lower in the various circ grades.

HALVES: From Good thru MS-63, the 1794-95 Flowing Hair and 1801-07 Draped Bust half dollars are also lower; the remainder of the "type" issues are unchanged. Again, a thorough look at the page six charts might be in order.

The 1934-47 Walking Liberty rolls and singles are unchanged this week---with the lone exception of the 1941-S roll (now in a lower $5500/$6000 range). A couple of the earlier Franklin rolls are slightly higher (1950-D and 1952-D)---along with the later bullion-related dates. A considerable amount of buyer interest is being monitored for complete 49-coin Kennedy sets at the present bid level of $180.

DOLLARS: A number of strong bidders remain in the market for BU dollar rolls. Plus signs are numerous---as potential buyers attempt to locate quantities. Of particular interest are the 1878-82 S-mints---with bags of each wanted. And, of course, higher silver bullion levels have had their effect on the circs---again, multi-bag quantities are being sought. And, at least two regular bidders continue to look for MS-65's in the $100-$350 range---and they are often willing to pay "over bid" for the "right" coins.

The Eisenhower series is also getting in on the act---with gains registered for most of the 40% silver issues in quantity bidding.

PROOF SETS and MINT SETS: The 1982-S set remains relatively difficult to locate---especially more than a few at a time; bidders are now offering $20.50. Changes among the other issues in both groups are slight (and most are the result of advancing bullion prices).

COMMEMORATIVES: Enthusiasm is still at an ebb among the commems. The occasional selling list receives little attention---and the few and far between bidders are still definitely only in a bargain-hunting mood.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $470.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Barely uncirculated, showing no evidence rubbing or friction. However no further qualifications are necessary to say a bag marked and/or weakly struck may not have full luster.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

BU SILVER DOLLAR ROLLS IN VERY STRONG DEMAND

Gem Single Dollars and BU Franklin Rolls also Join the Action

The Market in Depth

ALLEN HARRIMAN

Both silver and gold bullion prices have "bounced around" during the past week---reflecting the expected adjustments and rebounds which accompany any major upward swing in price levels. However, as we go to press, silver is at virtually the same price that it was last week ($8.92 vs. $9.04)---but 90% silver circ bags are substantially higher ($7760/$7860 vs. $7560/$7660). This higher premium is presumably the result of anticipated strength in bullion levels. Along with the higher bids for "junk" circ bags, the late BU siiver rolls have also enjoyed this upward adjustment. By the way, quantities of any of the late BU dimes, quarters or halves are far from easy to locate.

The search for silver dollars has dominated teletype activity throughout the week---BU rolls in particular. A quick glance at the page five chart will reveal that twenty-eight of the thirty-nine issues listed carry plus signs this week! (This is the greatest number of gains noted in this group in recent memory.) Several bidders are vying with each other for the large quantities needed---with some asking for "quotes" rather than stating specific buying prices. A more thorough look at the chart, by the way, will show that all of the rolls which are not sporting plus signs (eleven dates) are P-mints. In general, these Philadelphia rolls are the ones that are least likely to be of acceptable quality; even "original" rolls of many of the P-mints often prove to be dull and "baggy". It should also be noted that the MS-60 singles (and some MS-63's) of the corresponding sought-after rolls have been raised this week. Still, the roll bid is not simply twenty times the MS-60 bid price; buyers expect rolls which generally range from MS-60+ to MS-63. As stated at the top of the page five roll chart, "put-together rolls of overall low quality bring lower prices".

The second area which is noticeably on the upswing (again) is MS-65 single Morgan and Peace dollars. At least three major bidders are concurrently running lengthy buying lists---all with higher prices being offered for those dates needed. With only a few exceptions, the issues involved are the lower priced ones. And, of course, strict grading remains at MUST! It is interesting to note that these higher bids have resulted in only a minimum of actual transactions---due, in part, to overgrading on the part of some potential sellers, and, in part, to the current true scarcity of available gem specimens.

The September issue of the MONTHLY SUMMARY will accompany next week's regular mailing. It will feature an in-depth analysis of the August auction activity---as well as reflect the many price changes across the series covered which resulted from A.N.A. activity. This will be a very important issue!

This Week's Market

CENTS: Bidding for specific dates among the earlier BU Lincoln rolls seems to have increased just a bit this week; bidders, of course, are of the "fussy" kind and only strictly choice rolls will sell within current bid/ask ranges. Interest for the lower grade circ Indians and pre-1934 Lincolns continues---quantities are wanted at present levels.

NICKELS: The occasionally monitored bargain hunting among the BU Buffalo rolls (along with the Mercuries and Walking Liberties) is meeting with very little success. That is, if you don't count the inferior rolls which are sometimes shipped in hope they will be accepted. They won't! Three high-powered Jefferson rolls are lower this week (1939-D & S, 1942-D); otherwise, this series remains more or less out of favor.

A few adjustments have been made this week on the proof type coin chart---see page six.

DIMES: No further changes have been registered for the 1934-45 Mercury issues. At least one regular bidder is now having trouble locating most of the mintmarked rolls in the 1941-45 group. The "hot" 1948-P Roosevelt roll has suddenly soared to $250 bid---with one anxious buyer offering to pay as much as $270! The popular 1955-PDS rolls have also moved higher---along with all of the bullion-related issues.

Seated Liberty and Barber dimes in proof-60 and proof-63 condition are a bit lower. By the way, last week's higher bid of $675 for strictly gem MS-65 Barber dimes has yet to result in actual sales of properly graded specimens.

QUARTERS: Other than the bullion-related dates, the entire Washington series remains unchanged in continued light trading. The occasional dealer who needs a gem specimen of one of the earlier singles usually finds that they are not easy to locate at current prices.

In "type", the Standing Liberty quarters have nearly all been adjusted downward on the page six uncirculated chart. These type coin changes---along with those of the past two weeks---are the result of further analysis of A.N.A. auction and floor activity. (The final results of this analysis will be evident in next week's MONTHLY SUMMARY.)

HALVES: The Franklin series is suddenly enjoying strong bidder attention. Not only have the later dates all advanced in quantity bidding, but most of the earlier issues are also appearing on various "want lists" (several at higher levels). Some examples: 1950-P - $1000 (up $75), 1950-D - $625 (up $25), 1952-D - $270 (up $20) and 1953-P - $535 (up $25). The Kennedy series is also receiving a considerable amount of attention---basically, however, within current bid/ask ranges.

DOLLARS: A very active area of the market!---see comments in "The Market in Depth".

Continuing attempts to buy the 40% silver Eisenhower issues in quantity are being monitored. It is obvious that potential buyers are being quite cautious in raising bid levels; higher bids do not always pry loose the quantities needed. Those holding the coins might well wait to see if prices will continue to advance. The two issues which have edged higher this week are: 1973-S proof ($65) and 1974-S proof ($16).

PROOF SETS and MINT SETS: Both of these areas are basically unchanged this week. The most obvious exception is the small group of plus signs recorded for the 1959-64 silver mint sets. These gains, of course, are a result of silver bullion levels---along with the increased demand for Franklin halves.

COMMEMORATIVES: Gains have been recorded for the BTW and W-C sets in MS-60 (and some in MS-63) condition; quantities are wanted. Otherwise, both the silver and gold commems remain very quiet except for the widely scattered attempt to locate a "superb" specimen of one issue or another to fill a specific order.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $447.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter, inc.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (CHOICE UNCIRCULATED) Will have many bag marks and abrasions and above average number of contact marks. However, the coin must be attractive and problem free. Many bag marked coins may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning) MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

STIRRING AMONG "TYPE" PRODUCES SCATTERED PLUS SIGNS

BU Dollar Rolls, Singles & 40% Eisenhower Issues also Show Further Gains

The Market in Depth

ALLEN HARRIMAN

A quick glance at the enclosed September issue of the MONTHLY SUMMARY will reveal that minus signs dominate the price charts for the majority of series covered. And, on the surface, this may appear to be in contrast to the "firming trend" which has developed in the market during the past few weeks. Thus an explanation is in order to put this seeming contradiction in perspective. Readers will remember that the August issue carried only a relatively light scattering of price changes---in either direction. The August issue, of course, was published just prior to the A.N.A. Convention. This major event of the year (together with the several important auctions which were scheduled around the same time) presented an exceptional opportunity to evaluate the "climate" of every area of the market. In fact, such an opportunity to examine the pricing structure of the entire market occurs only during the yearly A.N.A. activity. The material offered not only at the auctions, but also on the vast number of bourse tables, afforded a complete overview. Accordingly, appropriate adjustments in price levels for those areas covered in the weekly CDN have already been incorporated into recent issues. And those which appear in the September MONTHLY SUMMARY finalize this evaluation in the areas covered on a monthly basis. Though not certain, of course, it appears that this month's major number of adjustments could well be the last such comprehensive downside changes of this market cycle.

And a further word about the significance of the changes registered. It will be noted that the lowered bid/ask levels have basically affected the better date coins in the various series. This is a reflection of the current "out-of-favor" status of the scarce and even rare dates---not of a lack of buyer interest in the "type" issues. For example, common date Barber coins are now appearing more and more frequently on buying lists---and a number of dealers are complaining that they cannot locate enough top quality pieces to fill orders or to replenish their stock. But, those buyers who are once again "in the market" are presently limiting their purchases to the lowest priced "type" coins---perhaps buying an occasional better date if the discount is attractive enough. And this is the tendency in most areas of the market. Thus, while better dates have been adjusted to reflect this attitude, the "firming" continues for "type" issues. In addition, the changes recorded among the MS-63, MS-60 and some of the higher circ grades reflects the continuing search for gem material. It should be noted, however, that we are also beginning to see an increase in bidding for MS-60 and MS-63 "type" coins. Apparently prices for these grades have also finally reached levels which now appear attractive to at least some potential buyers. Attempts to buy, it should be added, are more or less limited to the "basic" types---with less attention being directed toward the "with arrows", etc. varieties.

And while on the subject of a "firming trend", it should be mentioned that "bargain-hunting" across the teletype circuits has dwindled noticeably over the past few weeks. This is not only true for the "warm" segments of the market (BU dollar rolls, gem single dollars, Ikes), but also for most other areas. There are still some bidders who hope to locate material at discounts from current low levels, but their success rate is now questionable.

This Week's Market

CENTS: An advance to $750 (up $25) has been noted for strictly graded gem proof-65 Indian cents; quantities are wanted---but locating specimens without "problems" of one sort or another is far from easy. There is little to report about the BU rolls---trading is still light at best and prices are virtually unchanged.

NICKELS: Both Shield and Liberty nickels have also edged higher in gem proof-65 condition---with respective bid levels now pegged at $950 and $740. As with the Indian cents, examples without spots, hairlines or other detracting features are few and far between. Prices are steady among both the Buffalo and Jefferson groups; only scattered sales are being registered.

DIMES: Bid levels for some of the "basic" type issues have also edged higher in this area. "Stars obverse" Seated Liberty half dimes are now wanted at $1475---and the "legend obverse" variety at $1225 (in strictly gem MS-65, of course). Barber dimes in proof-65, by the way, have also moved slightly higher---at $1125 bid. As is generally true across the entire market, gems are not appearing for sale with any frequency.

Numerous Mercury issues---rolls and singles---in the 1934-40 group are lower again this week. On the otherhand, a few plus signs will finally been seen among the 1941-45 dates.

QUARTERS: Both the MS-65 "no motto" Seated Liberty and Barber quarters are now wanted in quantity at current respective bid levels of $1650 and $1000---and the "with motto" version has edged to a slightly higher $1450 bid. None of these are easy to find on today's market. A few of the earlier Washington rolls have been offered at lower prices---but increased bidding among the pre-1941 gem singles is producing few results.

HALVES: Several of the pre-1941 Walking Liberty singles have advanced substantially this week: 1934-D - $685, 1934-S - $1175, 1935-D - $725, 1935-S - $860, 1938-P - $315 and 1938-D - $1150. There is also considerable interest in gem specimens of the majority of the other 1934-47 issues---at current bid levels. Active bidding also continues in the Franklin series; bag quantities of most late dates are in demand.

In "type", proof-65 "with motto" Seated Liberty halves have moved to a higher $1900---and Barbers in the same grade are now bid at $2250.

DOLLARS: The search for BU rolls continues to dominate this area---and bid levels have again advanced for a number of dates. Of particular interest are the 1878-82 S-mints (all of which are higher this week). There are buyers who are willing to pay a little over current levels for the "right rolls".

The 40% silver Eisenhower dollars also remain on the move---with several dealers in the market for quantities; see page five for the latest prices.

PROOF SETS and MINT SETS: Only the usual minor adjustments---in both directions ---have been registered in these areas. Strong bidding continues at $145 for the 1979-S "type two" set---and a few transactions have been noted as high as $150.

COMMEMORATIVES: A relatively large number of minus signs will be found well scattered across the silver commem charts; most affecting the higher priced PDS sets and singles. (These are the issues which fared rather poorly at the recent major auctions.) It should be added that a considerable amount of "below market" bidding is now in evidence---usually a good sign.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on e basis of gold at $426.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (EXTREMELY UNCIRCULATED) Any impairment, such as a barely noticeable scratch, may show very slight signs of wear, but no trace of abrasion. Contact marks may not be noticeable without magnification.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63, but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

BU Dollar Rolls also Continue to Receive Quantity Bidding; Prices Advance

The Market in Depth

ALLEN HARRIMAN

A further light scattering of plus signs will be found this week in the MS-65 columns of both the uncirculated and proof type coins. So far, very few actual transactions have been recorded as a result of the recently increased bidding in this area. As has been mentioned previously, current attempts to locate gem "type" are more or less limited to the "basic" (and most reasonably priced) issues---with only a minimum of attention being directed toward higher priced material. This tendency, of course, is not at all unusual at this point in the market cycle. Interest in the more "exotic" types tends to come along later---and, if the upswing is strong enough---"dated" material after that. By the way, several dealers have reported that market "firming" continued to be in evidence at the just concluded Northern California Numismatic Association Show in San Francisco---and that gem material remains very elusive.

In addition to the plus signs which here and there dot the page six type coin charts, readers will find an ample supply of advances peppering the MS-65 silver dollar columns! In fact, there are at least four major potential buyers who are concentrating on gem MS-65 single dollars at the moment. Each of these bidders is running regular lengthy "want lists"---and each is interested in purchasing quantities of basically the same lower priced dates. The numerous gains this week have mostly been registered for those issues which fall into the $110-$375 or so range---although a few of the somewhat higher priced dates (1878-7/8tf, 1879-P, 1887-S, 1890-P & CC, 1891-P & CC, 1899-P, 1902-P, 1921-D along with a few Peace issues) have been included on these current buying lists. The available supply of dollars which meet the exacting requirements for "full MS-65" is very thin---and thus sales remain limited in spite of strong bidding. There are, however, plenty of specimens which carry the MS-65 description (often with ANACS papers) which fall a bit short---and which, therefore, continue to remain on selling lists after having been "passed" by one or more of today's buyers.

And yet another, more esoteric, area is also enjoying bidder attention. Several dealers are in the market for circulated specimens of the scarce and rare dates in the Seated Liberty series---and for similar issues in the various Liberty Head gold series. There are many very low mintage dates in these series which are very elusive in any grade---but which are frequently easier to locate in uncirculated or proof condition than they are in, say, Fine condition. Naturally, current bidding is resulting in few coins changing hands. When a bidder asks, for instance, for 1866 Seated Liberty dimes in Good thru XF, his chances of locating even a single specimens are rather slim. The coin has a mintage of 6000 business strikes---and finding one of them in circulated condition is mostly a matter of luck!

This Week's Market

CENTS: Slightly increased bidding has been noted this week for the 1934-40 BU Lincoln rolls. Attempts to buy scattered dates are mostly at present levels---with the occasional exception of the dealer who will pay "ask or a bit over" for immediate delivery of a particular roll or two. Bid levels, therefore, remain unchanged.

In "type", several gains have been registered---the new higher levels for MS-65's are: Flying Eagle cents - $1275/$1425, Copper-Nickel cents - $550/$610, common Indian cents - $230/$255 and Three-Cent nickels - $620/$695. All are now elusive in strictly graded condition.

NICKELS: This week's advances among the MS-65 "basic types" are: Shield Nickels - $775/$860, Liberty Nickels - $560/$620 and, in proof-65, Liberty Nickels - $750/$830.

Activity in BU rolls is still quite limited---although the 1938-D Buffalo roll is now eluding bidders at the $600 level.

DIMES: Except for an advance (to $265---up another $15) registered by the "warm" 1948-P Roosevelt roll, prices for the better dime rolls in both series are unchanged. Barber dimes have again cautiously moved slightly higher; bids of $680 for MS-65's are producing few actual results.

QUARTERS: As was indicated last week, interest in gem MS-65 examples of the earlier Washington quarters is on the upswing. Of particular interest are the tough 1934-D, 1935-D and 1936-D issues. None of these (or the others, for that matter) are easy to find at today's price levels.

Along with the dimes, Barber quarters in MS-65 condition have begun to edge forward; bid this week is recorded at $1025.

HALVES: All of the 1934-38 Walking Liberty singles have again moved rather substantially ahead---and the higher bids recorded are resulting in only scattered sales of strictly graded coins. At least two bidders are seeking these dates. And a number of the more elusive Franklin rolls are also on the plus side of the ledger this week---with bidders having some trouble locating "choice original rolls". (Many of the W.L. and Franklin rolls seen today have already been "cherry picked" for the gems they might have contained.)

Barber halves have followed the lead set by the dimes and quarters---MS-65's are now in an $1825/$2025 range and proof-65's in the $2300/$2550 area.

DOLLARS: BU dollar rolls continue to advance. Sixteen dates carry plus signs this week---with several dealers looking for quantities. Those dates, by the way, which do not show advances continue to enjoy strong demand within current bid/ask ranges. The MS-65 singles are quite active---see "The Market in Depth".

Although bid levels remain unchanged, bidders also remain active for the 40% silver BU and proof Eisenhower dollars. Again, buyers want quantities.

PROOF SETS and MINT SETS: The 1981-S "type two" proof set continues to receive bids of $90; few if any complete "type two" sets have been located. (For a description of this variety, see the September 10th issue.) Except for a slight lowering of a number of mint sets---and the 1982-S proof set---trading in this area remains more or less "as usual".

COMMEMORATIVES: An increased amount of below-market bargain hunting is being noted. Of course, offering to buy "strict MS-65's" at discount prices often results in the optimistic shipment of borderline specimens---which are promptly returned to the sender.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $404.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter, inc.

P.O. BOX 2308 HOLLYWOOD, CALIFORNIA 90028

Enclosed is my check/M.O. Please start sending me the Weekly NEWSLETTER as well as the MONTHLY SUMMARY by AIR MAIL/FIRST CLASS delivery for:

☐ 3 Months $18.00 ☐ 1 Year $60.00 ☐ 2 Years $110.00

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated, showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck—and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63—but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

DOLLAR ROLLS ADVANCE WITH STRONG BIDDING

Long Beach Show Judged "Positive" by Most Attending Dealers

The Market in Depth

ALLEN HARRIMAN

Activity at the just concluded Long Beach (Calif.) show continues to reflect the more positive attitude seen during the past several weeks. Most dealers reported a "good show"---with a number adding that they were "well pleased". There were, of course, others who were less pleased and, thus, less optimistic in their comments. Though the current market climate can be in no way likened to that of 1979-early '80, it should still be pointed out that even then complaints were not totally lacking!

Uppermost in the minds of many buyers at this show were, not surprisingly, BU silver dollar rolls. This week's chart (page five) contains another extensive rash of plus signs---with a number of dealers edging bids higher in their attempts to pry loose large quantities. Naturally, sellers are now few and far between; those who are willing to part with rolls are keeping price tags just ahead of current bid levels. The 1878-82 S-mint rolls remain at the top of several "want lists"---with the late O-mint rolls beginning to appear more and more frequently. Very few quantity transactions are being recorded and bags are now extremely difficult to locate. Once again, it should be pointed out that potential buyers will not pay full bid for "put-together" rolls of inferior quality (i.e. the worst specimens from a picked-over bag). Though today's rolls very seldom include even a single true MS-65, buyers definitely want "nice" rolls (which basically translates into an average quality of MS-60+/63). There is, of course, a bid/ask column for MS-60 singles---and a roll of twenty coins which meets only this standard will trade very close to twenty times the corresponding bid level.

Another sign of encouragement at the show was the number of dealer-to-dealer transactions that were recorded for strictly gem material at prices in advance of current bid/ask levels. Numerous sales of true MS-65 type coins---and silver dollars in both series---were noted at prices which were almost impossible to get only a few short weeks ago. One happy dealer aptly summed up the situation by saying: "I sold several top quality coins at 10%-15% over ask. Not long back all I would have gotten would have been a low counter-offer." Another dealer remarked: "Now almost everyone is asking for coins. A few weeks ago most of these same people were only interested in selling."

But, lest these remarks sound too optimistic, they should be tempered with the fact that all of the market's ills have not yet been solved. "Cash flow" is still a problem faced by many dealers, "bargain hunting" is still in evidence and, of course, there is the usual controversey about grading. However, there is no doubt that the number of "cheerful faces" among those involved in the coin market has multiplied during recent weeks. And such enthusiasm is definitely contagious!

This Week's Market

CENTS: Scattered bidding continued to be registered among the BU Lincoln rolls. Interest in this area, however, obviously remains in the "order filling" category. Seldom are quantities of a specific date or dates wanted---and bidders are more or less sticking with current price ranges.

Further attempts to buy the "basic" type coins also continue---at the higher levels noted last week.

NICKELS: Slightly increased bidding is being recorded in this area. The lower priced Buffalo rolls (particularly, as recently mentioned, 1938-D) and a few dates in the Jefferson series are now appearing on an occasional "want list". Again, however, current buyers seem content with present bid levels.

Among the "type" issues, both Shield and Liberty nickels (in strictly MS-65 condition) continue to elude potential buyers. Even the "common" dates in these two series are very difficult to locate in gem condition; strike and surface problems abound.

DIMES: There are now at least two bidders who are in the market for most of the 1941-45 Mercury rolls. And their regular offers of "bid" are far less successful than one might have imagined---although a few inferior rolls have been shipped (and returned). The 1948-P Roosevelt roll continues its advance; bid this week is $275---and few if any more rolls have been found. It should also be noted that lower bullion levels have not yet affected the late date Roosevelt (or Washington) rolls. In fact, one dealer will pay slightly over bid for quantities.

QUARTERS: Although bid levels remain virtually unchanged, a few buyers are in evidence for scattered pre-1954 Washington rolls. These are numerous rolls in the 1941-53 group which are very tough to locate in quantities of more than a roll or two at a time---and for which bid levels would probably advance rather quickly in the face of only moderate bidding. Current low prices for many rolls are the result of almost no buyer interest during the past many months.

HALVES: The 1934-40 Walking Liberty singles (in MS-65) have moved further ahead---and only a few properly graded pieces have changed hands at these new levels. In addition to these higher bids, there is now more interest in the 1941-47 rolls---at current bid levels (or, occasionally, at just a bit more). The Franklin roll have registered several more gains---along with a couple of losses (1949-S, 1951-D). Quantities of the later dates are still in demand---and bid has edged to $100 for any date.

DOLLARS: In spite of gathering strength elsewhere, silver dollars still remain the strongest area of the market. Several major buyers continue their search for BU rolls (needed in large quantities) and several others continue to bid regularly for gem MS-65's (mostly in the below $350 category).

Though prices are unchanged for the 40% silver Eisenhowers this week, quantity bidding is regularly monitored. The complete 1971-78 BU and proof roll set has moved to an even $4000 bid---with a few trading at even higher levels.

PROOF SETS and MINT SETS: Not very much to report here. Moderate trading continues among the later issues in both groups---with "mixed lots" sometimes available across the teletype circuits at "bid plus postage".

COMMEMORATIVES: The bargain-hunting continues---with a few dealers hoping to receive accurately graded specimens at further discounts. (The true gem pieces seen at coin shows, however, often carry premiums rather than discount price tags.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $386.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-63 (UNCIRCULATED) Will have minor bag marks ... may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scerce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

MARKET CONTINUES TO STRENGTHEN

Dollar Rolls Lead Latest Round of Advances

The Market in Depth

ALLEN HARRIMAN

With this issue we will get back to the three-year-plus pricing history for MS-65 type coins which began several weeks ago. In the interim, of course, we have experienced a few scattered downward adjustments for some issues---and the upward stirrings of a few others. As of this writing, at least, it appears that the "bottom" of the current market cycle has been reached---as recent tentative plus signs will attest. Thus, the price histories for dimes thru dollars which will be presented this and next week seem especially appropriate.

In the group covered in this week (early dimes thru Barber quarters), the 3½+ years advances range from a "low" of 74% (for the "no stars" S.L. dime) to a very high 426% (for the 1873-74 "with arrows" version). Again, these gains---considered to be "medium term"---are made even more impressive by the fact that these are the figures turned in by the various issues after the steep downward plunge experienced by the market since the "peak" was reached in the Spring of 1980. True MS-65 gems are currently more "salable" than at any time during the past two years. This makes the "percentage gain" column quite valid---since several anxious buyers are once again actively seeking top quality material. The need to "discount" in order to finalize transactions of qualifying coins has all but disappeared.

Now, let's take a look at the performances turned in by the twenty-three type coins in this week's group:

ISSUE	1/5/79	6/29/79	1/4/80	6/27/80	1/2/81	6/26/81	1/8/82	CURRENT	% GAIN
Dimes - Draped Bust (1796-97)	$ 8,000	$ 10,000	$ 20,000	$ 30,000	$ 30,000	$ 22,500	$ 22,500	$ 18,000	125%
Dimes - Draped Bust (1798-1807)	4,750	6,500	13,500	20,000	20,000	17,000	17,000	13,500	184%

Barber Quarters	325	500	1,250	2,500	1,750	1,600	1,650	1,050	223%

This Week's Market

CENTS: Light trading was noted this week in the Lincoln roll market. Gem "full red" BU and Proof Lincolns are appearing on dealer want lists. Flying Eagle cents in MS-65 are up another notch again this week and all the basic Copper type coins are very strong.

NICKELS: Several bidders are interested in buying "original" BU rolls of 1938-D Buffalos. Jefferson roll bidding remains sporadic. The "common" nickel type coins remain in demand with bid for MS-65 Proof Shield Nickels moving up to $975.

DIMES: This is now one of the more quiet areas of the BU roll market though the bullion related rolls are, of course, bid at higher levels this week.

QUARTERS: Washington quarters slipped a little as several small lots were offered at slightly below current levels. Both Barber and Seated quarters are wanted in grades AU through MS-65.

HALVES: Gem examples of the 1934 to 1947 remain a top priority for several bidders. Several dealers are now trying to locate BU rolls in the 1941-47 "short set". The Franklin rolls were very active (see page three).

DOLLARS: Dollar rolls are very strong as numerous bidders try to outdo each other. Also, Gem dollars were the subject of several lengthy want lists. Check the plus signs in the Ike charts (page five)!!

PROOF SETS and MINT SETS: Much more than the usual amount of teletype time is now devoted to buy message for proof sets. There seems to be a lot of demand for all issues.

COMMEMORATIVES: A few gold and silver issues drifted lower in generally light trading.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $448.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional texture of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics es the MS-65 --but with the additionel feeture of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are beged upon the merits of each coin. They renge from very scarce to unknown according to dete.

Prices for single BU sets and BU roll sets in this chert ere for "typical" coins. These usually everage MS-63 -but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues es listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

DOLLARS AND TYPE COINS LEAD FURTHER GAINS
All Areas of the Market are Now Active

The Market in Depth

ALLEN HARRIMAN

This week we complete the pricing history for MS-65 type coins which began several weeks ago---covering the last nineteen issues in the group. The "big winners" among the Standing Liberty quarters thru Trade dollars recorded 3¼+ gains in a 204%-250% range. Though not as impressive as the high 426% turned in by the 1873-74 "with arrows" Seated Liberty dime in last week's group, gains of these percentages still compare very favorably to advances (if any) which apply to the majority of non-numismatic areas over the same period of time. And again, as mentioned last week, it is important to keep in mind that the gains indicated are based on price levels in effect after the major market set-back (the downside of the market cycle) of the past two years plus.

We are very pleased with the positive reader response to this now concluded price history. It is apparent that current price levels for gem MS-65 type material is attracting collector/investors once agian---and this study affords today's buyers---and potential buyers---an opportunity to view the relatively recent pricing structure at a glance. Now, a look at the final nineteen issues:

ISSUE	1/5/79	6/29/79	1/4/80	6/27/80	1/2/81	6/26/81	1/8/82	CURRENT	% GAIN

This Week's Market

CENTS: Activity for BU Lincoln rolls seems to be picking up somewhat. Several bidders are interested in rolls and bags of the later dates. Very few BU Lincoln rolls have been offered for sale.

NICKELS: Jefferson rolls are very quiet. Only the 1944-S is receiving attention from current bidders. Buffalo rolls, however, are showing increased activity, led by the two "type" issues---1937-P and 1938-D.

DIMES: Several bidders are interested in buying Mercury "type" rolls. Some of the less expensive Roosevelt rolls are also in demand. The 1955-P roll has moved up a notch to a bid of $79.

QUARTERS: Some of the earlier Washingtons continue to drift lower. Later date Washingtons are receiving bids at current levels. Both Barber quarters and Seated quarters in BU and Proof (MS-65) moved up a notch this week, reflecting increasing strength in the type coin market.

HALVES: Franklin rolls continue to be a high priority for numerous bidders. Gem BU Barber halves are now bid $1850 while Gem Proof Seated halves moved up to $1950 bid. Walking Liberty halves are wanted by the roll and by the coin, i.e. MS-65 singles.

DOLLARS: There's another round of MS-65 plus signs for several of the elusive dates that have shared the spotlight during the past few weeks (see page five). Dollar rolls are still very much in demand but bidders suddenly seem content with current levels. Brown Ikes are still wanted in large quantities.

PROOF SETS and MINT SETS: Quantities are now wanted of all the 1956 to 1964 Proof sets. Mint sets on the other hand, are pretty dull at present.

COMMEMORATIVES: Commemorative action was mixed this week with numerous less expensive items moving up while some of the "big ticket" PDS sets drifted lower.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $434.60 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) end may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

Average coins showing even distribution of wear from light to heavy. Some luster remains but may be dull. Rims are generally flat. Most detail is worn smooth but the date and mint mark are usually clear. Have no bag marks.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-65 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

BU HALF DOLLAR AND DOLLAR ROLLS ADVANCE

Late P-Mint Mercury Rolls & XF/AU thru MS-63 Silver Commems also Move Ahead

The Market in Depth

ALLEN HARRIMAN

A relatively liberal scattering of plus signs will be found scattered across the page two silver commem chart this week. These advances, however, have not been recorded for the gem MS-65 specimens---but rather for the often very elusive XF/AU pieces and for a number of issues in the MS-60 and MS-63 categories. There are, of course, numerous silver issues which are much easier to locate in the lower uncirculated grades than they are in XF/AU---issues which seldom reached circulation (even though they may have been improperly cared for through the years). This doesn't hold true to the same extent for the gold commems---most, if not all, of which can be found much more easily in the higher circ grades. This week's higher bids, by the way, are not only the result of teletype bidding but are also compiled from legitimate buying lists of dealers who are not members of the teletype systems. (It should also be mentioned that those collectors and investors who are not thoroughly familiar with the grading of commems should be careful not to purchase a "cleaned up" or "retoned" XF/AU coin as uncirculated!)

The current status of gem MS-65 silver commems, on the otherhand, is a more confusing one. There are a few dealers who specialize in this area who report "good sales" at---and even well above---present bid/ask levels. These dealers, not surprisingly, feel that bid prices should also be advancing in this category. However, none of the bidding being monitored at this time is at higher levels. Indeed, most of the attempts to buy gem specimens fall into the bargain-hunting category---and there is the occasional seller who offers coins at or near today's chart prices. Grading, of course, is the problem. The "specialists" feel that most of the MS-65's offered are actually something less; the sellers disagree---stating that many of the strong buyers will really take only MS-67's. (This is much the same attitude which has been evident in the silver dollar market for a long time now.)

The 1981-S "type two" proof set continues to make news---with the complete set (in the original sealed holder) now bid at $105. Bidding for all six of the individual rolls is also finally being monitored---as follows: cents - $160, nickels - $80, dimes - $100, quarters - $110, halves - $450 and dollars - $780. The appropriate price charts are currently in the process of being revised---and all of these issues will soon appear as part of our regular weekly market coverage.

One major buyer is still in the market for the overdates, varieties and tougher dates among the Bust half dollar series. Frequent bidding nets only an occasional properly graded specimen. The latest bids in this group are as follow:

	F	VF	XF		F	VF	XF

This Week's Market

CENTS: Buyer interest continues for quantities of numerous late date Lincoln rolls; a few advances have been noted as dealers search for "original bags". Bidding for circulated half cents and large cents is also now being regularly monitored (mostly at current bid levels).

NICKELS: Although the better date rolls in the Buffalo "short set" group are being ignored, dealers are still looking for the lower priced "type" rolls (1937-P at $650 and 1938-D at around $600-$625). Except for another small gain registered by the 1944-S roll (to $225) interest in Jefferson rolls remains basically at a standstill. One or two teletype bidders are also in the market for MS-65 "full step" singles. They generally ask for the tough dates---requesting for "quotes" rather than stating specific bids.

DIMES: "Common date" P-mint Mercury rolls are appearing more and more frequently on various buying lists---and bid levels have edged slightly higher this week for the 1941-44 issues. Recent sellers have either disappeared or have raised their selling prices. In the Roosevelt series, the 1948-P has moved to $295 bid (up $20) and the 1955-P is a bit higher at $82 in quantity bidding.

QUARTERS: After lower prices over the past couple of weeks, the earlier Washington singles and rolls have again settled down---and, in contrast, a few of the "short set" rolls have edged higher this week (1946-P, 1948-P, 1951-D, 1953-D). Increased interest is also evident for quantities of the oft' popular 1955-D roll---though still only at current levels.

HALVES: This remains the "warmest" area among the minor denomination rolls. The 1934-40 Walking Liberty singles continue to appear on "want lists" at recently increased bid levels---and the later "common date" rolls have all edged higher. There are also more frequent attempts to buy the 1941-47 mintmarked rolls---at prices in line with those presently recorded.

Bidding for virtually all Franklin rolls also continues to be regularly seen across the teletype circuits---with several dates carrying plus signs this week (see page three). Sellers of "choice original" rolls are few and far between.

DOLLARS: BU dollar rolls remain on the minds of numerous strong buyers---and plus signs once again dominate the page five chart. These potential buyers are in the market for quantities of nearly all dates which are still traded by the roll. (Please re-read the grading qualifications for dollar rolls which correspond to bid/ask levels---at the top of the price chart.)

The Eisenhower series is also perking all quite well. Quantity bidding continues from several sources---and bid levels have again been cautiously edged higher. The complete 1971-78 roll set, by the way, is also higher at $4100 bid (up $100).

PROOF SETS and MINT SETS: Both the 1979-S "type two" and the 1982-S sets are lower this week---at new respective bids of $135 and $16. Changes among the other issues are scattered and slight---although the 1970 and 1973 mint sets are wanted in quantity at present bid levels.

COMMEMORATIVES: Buyer interest is definitely on the upswing for XF/AU and lower grade uncirculated silver issues. See comments in "The Market in Depth".

☆

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $416.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (CIRCULATED) Any coin that has been circulated showing some wear. Luster may be present but the high points of the design are worn / some detail may be missing.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks. May show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror proof-like surfaces both sides.

Anthony Dollars - 1979-1981 (inc. S-proofs)	145.00	157.50	2800.00	3050.00				

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summery.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

ELIASBERG GOLD COINS BRING RECORD $12,426,371

Collectors and Dealers Bid Fiercely in "Once in a Lifetime" Auction

The Market in Depth

ALLEN HARRIMAN

The just concluded "United States Gold Coin Collection" of the Eliasberg coins was a "once in any lifetime" occurrence---with every regular issue U.S. gold coin represented. Collectors and investors seized the opportunity---and descended upon New York City to attend the Bowers and Ruddy three session auction (October 27-29) in great numbers. Those who went expecting "bargains" were disappointed; those who thought there would be firece bidding and record prices saw their expectations realized.

The total sales were $12,426,371---breaking the previous single auction record set by "Garrett II" in March of 1980. From the unique, rare and scarce coins thru common "type" issues prices were very, very strong. This is especially significant, of course, in view of the current state of the general overall economy and the coin market specifically. Though the CDN will present and in-depth analysis of the entire proceedings in the upcoming November MONTHLY SUMMARY, the following prices realized listing will give reader a quick overview of the strength of the spectacular auction (all prices include the 10% buyers premium):

COIN	GRADE	PRICE
1850 "type one" $1	MS-67	$ 11,000
1854 "type two" $1	MS-67	30,800
1881 "type three" $1	MS-67	5,225
1808 Capped Bust $2½	AU-55	26,400
1821 Capped Bust $2½	Pr-67	46,200
1833 Capped Bust $2½	Pr-67	50,600
1838 Classic Head $2½	MS-67/65	13,200
1841 Liberty $2½	Pr-63	82,500
1851 Liberty $2½	MS-67	7,425
1854 Indian $3	Pr-63	39,600
1870-S Indian $3	XF-40	687,500
(a new record for any regular issue U.S. coin)		
1875 Indian $3	Pr-65	110,000
1879 Coiled Hair $4 "Stella"	Pr-67	101,750
1798 Capped Bust (small eagle) $5	VF-30	77,000
1815 Capped Head $5	AU-50	71,500
1818 Capped Head $5	MS-67	39,600
1822 Capped Head $5	VF/XF	687,500
(tying the above record price)		
1825/4 Capped Head $5	Pr-60	220,000
1829 Capped Head (lg. date) $5	MS-65/67	82,500
1854-S Liberty $5	AU-55	187,000
1861-D Liberty $5	MS-65/63	37,400
1875 Liberty $5	Pr-65	60,500
1894-S Liberty $5	MS-67	19,800
1901-S Liberty $5	MS-67	9,900
1908-S Indian $5	MS-65	9,900
1910-S Indian $5	MS-65	12,100
1913 Indian $5	Pr-67	14,300
1795 Capped Bust $10	MS-63/65	57,200
1839 Liberty (lg. letters) $10	Pr-65	121,000
1857 Liberty $10	Pr-65	77,000
1875 Liberty $10	Pr-65	104,500
1902-S Liberty $10	MS-67	19,800
1908-D Indian (w/m) $10	MS-65/67	18,700
1914 Indian $10	Pr-67	24,200
1933 Indian $10	MS-65	93,500
1864 Liberty $20	Pr-67	44,000
1884 Liberty $20	Pr-65	82,500
1899-S Liberty $20	MS-67	16,500
1904-S Liberty $20	MS-63/65	7,700
1907 Ex High Relief St. Gaudens $20	Pr-67	242,000
1907 High Relief St. Gaudens $20	Pr-65	50,600
1907 High Relief St. Gaudens $20	MS-65	17,600
1909-D St. Gaudens $20	MS-65	37,400
1927-D St. Gaudens $20	MS-65	176,000

This Week's Market

CENTS: Increased bidding for BU Lincoln rolls is being monitored. In fact, practically all of the 1934-to-date issues are appearing on the buying lists of one of the country's leading cent dealers---but, so far, bids fall more or less into the bargain-hunting category. Thus, very few top quality rolls have been located. However, less-than-choice rolls are frequently shipped in the hope that they will be considered "alright at the price". (They aren't.) A few minus signs are scattered among the later dates due to some quantity offerings; scattered gains will also be noted.

NICKELS: The 1938-D Buffalo roll has settled back to a $585/$635 trading range. With this lone exception, the rest of the 1934-38 "short set" issues are currently seldom asked for (or offered). Nor is the Jefferson group any more active; a couple of issues have edged a bit lower in very light trading.

In "type", MS-65 three-cent nickels have been cautiously raised to $640 bid, "no cent" Liberty nickels in proof-65 are up to $1100 and the "legend obverse" S.L. half dimes in the same condition are now wanted at a slightly higher $1325.

DIMES: There are several dealers who now want one to as many as ten rolls of common P-mint Mercury dimes. Offers to "pay bid" are meeting with only limited success. (One strong buyer is in the market for 1942-P rolls to fill a specific order; offers to pay "ask or over" haven't yet resulted in the desired transactions.) The Roosevelts are mostly quiet---with a few small gains recorded.

The "legend obverse" S.L. dime in proof-65 has followed the example set by the half-dime; bid is now $1150.

QUARTERS: Changes among the Washingtons are evenly divided between minor gains and losses. In the earlier group, the 1938-S and 1939-S are lower in grades AU thru MS-65---and a few later rolls are now on "want lists" at slightly increased bid levels (1951-D, 1952-P, 1953-D, 1955-D, 1958-P).

"No motto" S.L. quarters have advanced to $1700 bid in strict MS-65 condition---and the same issue in proof-65 is higher at $1525.

HALVES: Several of the pre-1940 Walking Liberty singles have registered further gains. (Regular bidding at previous levels were obviously not prying loose the desired number of specimens.) In addition, all of the lower priced "short set" rolls have advanced another notch. All of the adjustments on the Franklin chart are on the positive side---with the exception of the high powered 1949-S roll (now in a lower $3000/$3250 range). Check page three for the other changes.

Seated Liberty halves are also enjoying bidder attention. The "no motto" version is bid this week at $2150 in both MS-65 and proof-65 condition---and the "with motto" in proof-65 is receiving bids of an even $2000.

DOLLARS: Another extensive round of plus signs pepper the BU dollar roll chart. A number of dealers are seeking bag and multi-bag quantities of the 1878-82 S-mint and most of the 1883-1923 P and O mint rolls. These buyers all want "nice" rolls---and they will not accept put-together groups of "left overs". Changes among the singles this week are mostly the result of increasing roll prices. Circ dollar rolls have thus far failed to respond to higher bullion prices.

The "no motto" S.L. dollar in MS-65 condition has edged up to $3250 bid---and Trade dollars in proof-65 are higher at $3100 bid.

PROOF SETS and MINT SETS: Only a few small downward adjustments have been recorded this week; the most important is the move to $130/$140 for the 1979-S "type two" proof set. The 1981-S "type two" set, by the way, is still receiving bids of $105. (This set will be added to regular chart coverage next week.)

COMMEMORATIVES: Bargain-hunting for MS-65's is still been practiced by major commem dealers. Complaints about "optimistic" grading are frequently heard---and a large percentage of the coins being received are returned to the sender. Bidding also continues for the other grade categories---but in these areas there is less bargain hunting and more "serious" bidding. The new Washington commem is listed for sale at $11.50 in proof and at $8.75 in BU condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $428.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter, inc

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

Many [illegible] A [illegible] showing [illegible] evidence of [illegible] Coins with [illegible] are [illegible] weakly struck may not [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning) MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

NUMEROUS BUYING LISTS REFLECT COLLECTOR-ORIENTED NEEDS

XF/AU Silver Commems Record Further Gains; "Type" Also Edges Forward

The Market in Depth

ALLEN HARRIMAN

A great deal of "collector-oriented" bidding has been monitored for some weeks now. These attempts to locate specific dates in specific grades---often in quantity---cover a wide spectrum of interest. A couple of weeks ago we reported the new higher bid levels for the scarce date, overdates and varieties in the Bust half dollar series. These same bids continue to appear regularly on the teletype circuits---with only an occasional coin or two changing hands. Among the issues joining this extensive "want list" are the Indian and early Lincoln cents. Some of the current buyers want quantities in defect-free G/VG condition (even minor problems are usually cause enough for rejection); others are interested in VF, XF and AU specimens.

Both the Liberty and Buffalo series are also getting into the act---again wanted in the lower grades as well as the surprisingly elusive middle grades. Finding practically any of the Liberty nickels in VF or XF condition is a time consuming task---with the finding of more than one or two pieces being something of an "occasion". The "middle year" Buffalos (from 1917 thru 1926 or 1927) are particularly tough in full horn VF and sharp XF condition---and hopeful bidders are being a bit more liberal with the offering prices. (Higher levels will appear in next week's MONTHLY SUMMARY.)

Another area which is receiving more and more attention is the Barber coinage. Again, "want lists" include a substantial number of issues in various grades (even including AG specimens of the key dates). And, not to be left out, Standing Liberty quarters are also appearing on the relatively recent rush of buying lists. As stated earlier, dealer interest in this circ material is obviously a result of increased collector interest in these series. This area, of course, was almost entirely overlooked during the "boom market" of 1978-80. Today's more orderly market---and more reasonable prices---leaves more time for dealers to concentrate on less volatile areas.

Readers will note that several minor additions have been made to a number of pricing charts this week. On page three, the five denominations of 1981-S "type two" coins have been added to the roll chart. Bidding for these rolls has been strong during the past few weeks---with only a limited number of actual transactions being registered. On page five, the same issue, of course, has been added to the Anthony dollar section---along with a new listing for the complete set in the proof set chart.

In the circulated rolls section, VG/better and 1878-1904 VF/better silver dollar roll listings will again be found. And, in the single sets chart, there is again a price for VG/better Morgan and Peace dollar sets. The reinstatement of these last listings are the result of a number of subscriber requests.

This Week's Market

CENTS: Relatively strong buyer interest continues to be monitored for quantities of late date BU Lincoln rolls. Two major bidders are regularly trying to locate bags of most dates from 1965 thru 1980. One seems basically to be "bargain hunting"; the other has rasied several bid levels. It is interesting to note that neither buyer is meeting with much success. The earlier rolls, by the way, are being very lightly traded---mostly within current bid/ask ranges (if truly choice).

Both the Flying Eagle cents and the one-year-of-issue 1859 Indian cent in MS-65 condition are receiving slightly higher bids ($1325 and $1275 respectively); very few strictly graded specimens have been located.

NICKELS: Neither the Buffalo nor Jefferson series is enjoying much attention. Prices are steady, however---and only scattered rolls are being offered for sale.

In "type", interest remains evident for "common date" Three-cent nickels, "no rays" Shield nickels and both versions of the Liberty nickels. Regular offers of "bid" produce practically no transactions.

DIMES: With the exception of continued interest noted for the 1942-P roll (now bid at $450), bidding among the Mercuries is mostly at current levels. Several potential buyers are still in the market for the late P-mint rolls. The Roosevelt series, too, is basically steady at present prices.

Advances for the "type" dimes are numerous. This week's plus signs for MS-65's include: Bust (large) - $5100, Bust (small) - $3800, S.L. (legend) - $925 and Barber - $710. And for Pr-65's: both S.L. (legend) and Barber - $1175.

QUARTERS: Scattered attempts to buy gem MS-65 early Washingtons are being monitored across the several teletype circuits. Bidders report that many of the specimens received fall into the "just miss" category. The "short set" rolls are firm---except for the later bullion-related issues which are slightly lower.

Barber quarters are a bit higher at $1100 bid (in MS-65 condition, of course); few are available at this level.

HALVES: Last week's higher bids for a number of the pre-1941 Walking Liberty singles remain in effect; as with the quarters, grading of the pieces shipped to bidders is a big problem. One regular bidder is also in the market for a majority of the 1941-47 rolls; offers of "bid" are mostly unsuccessful.

Following the trend set by the dimes and quarters, Barber halves have registered another gain---bid is now an even $1900 for strictly graded MS-65's.

DOLLARS: The usual strong bidders continue the search for gem MS-65 Morgan and Peace dollar singles. And, also as usual, some of the prices being offered for the "right" coins are slightly over current bid levels. There are other bidders, however, who are offering a bit less. Neither group is having much luck---although "almost there" coins abound. Strong demand continues for most BU dollar rolls---mostly at current levels.

The Eisenhower series is still quite active---even though several issues have slipped just a little this week.

PROOF SETS and MINT SETS: The 1981-S "type two" set has been added to the page five chart this week. Bid for the very elusive complete set is pegged at $115. (Bid levels for the corresponding rolls will be found in the appropriate charts.) Trading among the other proof and mint sets is light to moderate---and within bid/ask levels.

COMMEMORATIVES: The search for many of the silver issues in XF/AU condition continues; prices have edged forward again for several of the issues which are actually more elusive in this condition than they are in MS-60 or MS-63. Bargain-hunting is still regularly seen for the MS-65's---with little results being noted. Several adjustments have been made for the XF/AU and MS-60 gold issues---see page two.

U.S. GOLD: (Prices ara for the most common date of each type.) Bullion relatad gold coins in this issue ara figured on a basis of gold at $405.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (EXTREMELY FINE UNCIRCULATED) Will show light overall wear on the highest points of the design, but will have full detail and some luster. Some bag marks and/or weakly struck areas may be present.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63- -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

BIDDERS CONTINUE SEARCH FOR VARIED MATERIAL

"Successful" 3rd Annual National Silver Dollar Convention Concludes in Houston

The Market in Depth

ALLEN HARRIMAN

The 3rd National Silver Dollar Convention was held in Houston over the weekend of November 12-14. The general consensus was quite positive---with most dealers reporting "good sales at good prices". Virtually all of the country's silver dollar dealers were in attendance (over 130 bourse tables) and various seminars on grading, counterfeit detection and special varieties were included as part of the proceedings. Major guest speakers helped make this by far the most successful convention of its kind.

The "grading controversy" has by now become an almost standard fixture of the coin market---and the silver dollar convention proved to be no exception. "What makes a MS-65", of course, was the most frequently discussed question. There were dealers who were selling their "MS-65's" at ask---and often well over; there were others who were offering their "MS-65's" at various discounts from bid. But there is certainly no question that most of the buyers of 1982 are quality consious and that they know exactly what they want.

There were some "wonder prices" recorded for exceptional specimens which were offered for sale---but many of the extraordinary coins which appeared were "for display only". A few actual transaction prices which were typical: 1881-O "MS-66" - $525, 1883-O MS-67 - $250, 1883-CC MS-67 PL - $2400, 1885-P MS-65 PL - $425, 1885-CC MS-67 PL - $2500, 1896-P MS-65 PL - $750. There were numerous other examples of "over bid" sales and the plenty of others at below---in other words, more or less as would be expected at any show with over 130 bourse tables and a large number of others in attendance.

As was discussed last week, an increased amount of "collector oriented" bidding is now oeing monitored across the teletype circuits. Interest in "dated" material in various grades continues and, though prices are being edged forward only cautiously, a number of plus signs will be found scattered across the various charts in the enclosed November issue of the MONTHLY SUMMARY.

Readers will also note a substantial number of advances on the page three gold type coin price charts. They are, of course, a result of the recent auction of the Eliasberg collection---and the ensuing buyer interest thus stimulated. (An in-depth report on this landmark auction and its relationship to the current market is featured in the MONTHLY SUMMARY.) Bidding, by the way, for the lower priced gold "types" (which are listed on page one of the weekly CDN) continues unabated at last week's higher levels. Success, nowever, is extremely limited.

This Week's Market

CENTS: In addition to continued interest in quantities of late date BU Lincoln rolls, the 1909-33 singles are being sought in MS-60, MS-63 and gem MS-65 condition. Several price advances will be found in the enclosed MONTHLY SUMMARY; numerous bidders, however, are asking for "quotes" rather than stating specific buying prices.

NICKELS: As usual, the Jefferson series is basically unchanged---and very lightly traded. Interest in this area remains limited to the occasional attempt (mostly successful) to locate a specific roll(s) to fill a particular order.

In "type", proof-65 Shield and Liberty nickels have both reocrded gains---with new respectively bids of $1000 and $785.

DIMES: Changes are minimal for the Mercury rolls---with most bidding still centered around the common date rolls (several buyers are interested).The still "warm" 1948-P Roosevelt roll has edged forward to $300 bid---and both the 1946-S and 1955-P rolls have registered small advances.

Although bid levels are unchanged, potential buyers are still seeking gem MS-65 examples of "legend obverse" S.L. dimes (at $925) and Barber dimes (at $710); few strictly graded pieces have been located.

QUARTERS: The Washingtons, too, are basically steady at current levels---with most of the bidding also of the "specific order" variety.

The "no motto" Seated Liberty quarter in gem MS-65 condition remains very elusive at this week's higher bid level of $1750---and the "with motto" version is only slightly more available at its new bid of $1500. Barber quarters in the same condition also continue to elude bidders at $1100.

HALVES: A number of plus signs will again be found on the Walking Liberty chart. Among the singles, the 1938-P is higher at $375 bid---and the 1939-D has moved up to $260. Several dealers report that locating full MS-65's of any of the 1934-40 issues is quite difficult---although, of course, "just miss" specimens are frequently encountered. In addition, all of the 1941-45 P-mint rolls---along with the 1946-D---are bid at higher levels this week. Moderate bidding continues in the Franklin series---with the 1953-S and 1956-P rolls again advancing.

The "no motto" and "with motto" S.L. halves have followed the example set by the quarters; higher respective bids of $2200 and $1900 now in force for gem MS-65's.

DOLLARS: Two or three dealers continue the search for strict gem MS-65 Morgan and Peace dollar singles---still often offering a little over current bid levels for the "right" coins. Moderate bidding also continues for the BU rolls---but mostly at (or even slightly below) recently recorded levels.

And here, too, the Seated Liberty issues are enjoying higher bids. The "no motto" dollar is higher at $3300 bid---and the even more elusive "with motto" version is wanted at $3600.

PROOF SETS and MINT SETS: Strong buyer interest remains in evidence for the 1981-S "type two" proof set. In fact, this set is fast approaching the '79-S version with this its new bid of $120 (the '79-S "type two" set is again a bit lower at $125 bid). The 1960 "small date" set has moved ahcad to $25 bid (up $2); other changes are slight.

COMMEMORATIVES: There are bidders for silver commems in all four gradc categories---but most continue to pay prices in line with current bid/ask levels (or to "bargain hunt"). The eleven gold issues are quiet.

☆

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue ara figured on a basis of gold at $405.10 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Has no bag marks but may be unevenly struck or poorly centered. Surfaces may be impaired by contact marks, hairlines or other defects. Moderate to heavy overall toning may be present. Luster may be dull or lifeless. Eye appeal is below average. Strike may not be full.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

TOP QUALITY PROOFLIKE MORGANS ELUDE BIDDERS

Gem Early Lincolns Appear on Numerous "Want Lists"

The Market in Depth

ALLEN HARRIMAN

The number of buyers for gem MS-65 (as well as superb MS-67) pre-1934 Lincoln cents has been on the increase for some time now. Finding all but a few of the many dates in the 1909-33 group in this condition is not an easy task. The 1932 and 1933 issues, along with a few of the earlier P-mints, are the easiest---with all of the others presenting varying degrees of elusiveness. There are several teletype bidders who have joined this search---and most are willing to pay prices that are at least in line with the ranges reported in the most recent issue of the MONTHLY SUMMARY.

Though none of the 1909-15 issues are plentiful, the problem of strike is seldom the major deterrent to sales among the early dates (1911-D and 1912-D can be exceptions). Strike, however, does begin to become an increasingly aggravating problem after 1915---and, by 1920 or 1921, weakly struck pieces (or coins from a weakening master die) become more and more the rule rather than the exception. By 1922/1923, both the Denver and San Francisco coins almost invariably leave much to be desired in this area. In fact, there are several pre-1929 branch mint issues which are far more scarce in true gem condition than current bid ranges indicate. Finding a fully struck 1925-D or S, 1926-D or S, 1927-D or S or 1928-S is a real "occasion"---especially if the coin meets the other requirements to fit into the MS-65 or MS-67 category. (All true MS-67's, by the way, "speak for themselves" as far as price levels are concerned.)

Of the other qualifications necessary, marks and abrasions also enter into the picture. However, the size and lightness of this denomination naturally preclude these aspects from being a major problem. There are coins with detracting marks, of course---but they occur far less frequently among cents than among the larger coins. Naturally, spots are a "no-no"!

This leaves the color factor. And color has long been the most controversial area when determing whether or not a Lincoln cent is MS-65 (or better) or not. Whereas a toned silver coin is frequently considered to be even more desirable than a bright one, a toned copper coin is often downgraded due to toning alone. Original toning, of course, is a natural phenomenon. Silver coins left undisturbed over a long period of time very often develope attractive "rainbow" hues and it wasn't long back that large premiums were paid for such pieces---the more "color" the better (as long as the coin wasn't too dark). There has even been many instances of spectacularly toned silver coins bringing "runaway prices" even though, strictly speaking, they were only MS-63 beneath the color!

However, it is the "original red" Lincoln that is generally the object of today's search. For some reason, natural toning on copper coins is not desirable to the majority of buyers. There are some collectors (and perhaps even some dealers) who do not agree with this requirement. But, in order to bring prices commensurate with present bid levels, it almost invariably takes a brilliant coin. Whether or not this will be the case thru the coming years remains to be seen. However, today's buyers are seeking fully struck, mark-free, spot-free and original red early Lincolns. Finding them is a slow process!

This Week's Market

CENTS: Continued attempts to locate bag quantities of 1959-79 Lincolns have pushed bid levels higher for numerous dates; sales are still relatively limited. The 1980-82 S-mint proof rolls, on the otherhand, have slipped a bit lower this week---with several sellers noted.

Gem MS-65 examples of Flying Eagle cents, 1859 and 1860-64 copper-nickel cents continue to elude regular bidders at their current respective bid levels.

NICKELS: The 1938-D Buffalo nickel roll has edged back up to $600/$650---with an occasional transaction recorded within this range. The remainder of the "short set" rolls are unchanged. A few minor adjustments will be found among the wartime Jefferson rolls; this series, too, remains quiet sluggish.

Bidders seeking type coins are still finding that gem examples of Shield and Liberty nickels are few and far between---at least, at present bid levels.

DIMES: Although very little attention is being directed toward the various mintmarked Mercs, there are a number of potential buyers who are interested in the common P-mint rolls; the minimum bid has moved up to $385 this week (except for the 1945-P---which remains at $365). Further buying attempts are noted for the 1948-P and 1955-P Roosevelt rolls---at current levels.

QUARTERS: A sudden rash of below market bidding has been registered for virtually all the 1940-55 Washington rolls. The prices offered, however, haven't encouraged many transactions. (The occasional "serious" buyer usually has to pay at least bid in order to fill his order within a reasonable time. Bargain offerings in this series have all but disappeared.)

In "type", both the "no motto" and "with motto" Seated Liberty quarters are wanted in gem MS-65 and gem proof-65 condition. Current bid levels seldom produce correctly graded specimens.

HALVES: "Common date" Walking Liberty rolls have again edged ahead another notch; bids of $1125 remain basically ineffective---with several dealers in the market for five to ten rolls. In addition, the pre-1941 singles remain quite elusive in gem MS-65 condition. Interest in the Franklin series is definitely on the increase. Even though advances are minimal this week, the number of bidders has multiplied and quantities are wanted.

The Bust half dollar in strict MS-65 condition has moved to $2850 bid (with at least one bidder willing to pay $3000). This is a very tough coin in gem condition, even though in grades MS-60 thru "MS-64" it is relatively plentiful.

DOLLARS: "Full" MS-65 prooflike Morgans are now few and far between---as those seriously interested in buying such specimens will attest. A number advances in this category have been recorded this week---and there are several dealers who will gladly pay at least the "high end" of current bid ranges for strictly graded pieces. Higher bids have also been noted in the MS-65 columns this week---see page five.

The Eisenhower series, on the otherhand, is "retrenching" a bit---with most of the 40% silver issues being listed for sale at slightly lower levels.

PROOF SETS and MINT SETS: Adjustments in these areas are minimal as usual---with a moderate number of sales being recorded. Attempts to buy the 1981-S "type two" proof set continue at least week's level of $120 (which is now the same price as the 1979-S version).

COMMEMORATIVES: Several buyers still want XF/AU examples of those silver commems which are elusive in this grade. Interest also continues for most issues in MS-60 thru MS-65---but in these uncirculated grades "bargain hunting" is still the dominate approach. (There are very few dealers, however, who are willing to part with their coins at below market levels---at least, the properly graded ones.)

U.S GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issua ara figured on a basis of gold at $405.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE. the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) A coin so graded showing no evidence of rubbing or friction. However, minor surface imperfections are permissible, such as bag marks and a weakly struck area may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-66 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-85 -but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63- but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

CURRENCY DEALER newsletter
The Currency Dealer Newsletter (offspring of the Coin Dealer Newsletter) offers the Numismatic World the most COMPREHENSIVE and UP-TO-DATE pricing guide available. Ever-changing Dealer-to-Dealer BID/ASK CHARTS cover (in depth, in all grades) the following areas:
* Large Size U.S. Notes
* U.S. Fractional Currency (plus Proof and Specimen notes)
* Small Size U.S. Notes
* Uncut Sheets (small size currency)
. . . plus . . . Auction reports! Issue by issue charts! In-depth articles & analyses! and more!
Subscription rates:
ONE YEAR (12 issues) . . . $20.00
TWO YEARS (24 issues) . . $37.50
Send Check or Money Order to:
P.O. Box 2308
Hollywood, CA. 90028

***newsletter* BACK-ISSUES AVAILABLE**

Complete your FILE of GREY SHEETS
We still have available a limited number of back issues since publication began on June 14, 1963! Your completed file will enable you to "chart" your favorite issues . . . to pinpoint trends and to spot the best buys in the current market.
And, of course, the in-depth Monthly Summary articles and pricing guides (which began in August, 1976) have covered virtually every aspect of U.S. Numismatics. These studies have been authored by many of the country's leading numismatic authorities . . . and are a "must" for any library!
BACK-ISSUE PRICES:
1 to 10 issues . . . $2.50 each
11 to 25 issues . . . $2.00 each
26 to 100 issues . . . $1.50 each
over 100 . . . . . $1.00 each
For entire series, write (or call (213) 666-8717) for cost.
For complete listing of Summary articles, please send self-addressed, stamped envelope to: the COIN DEALER NEWSLETTER

COPPER THRU GOLD "TYPE" RECORDS FURTHER GAINS

Numerous Bidders Continue the Search for "Top End" AU Material

The Market in Depth

ALLEN HARRIMAN

As can be quickly seen from both the page one and page six type coin charts, bidding this week for gem MS-65 specimens from copper thru the larger gold denominations has pushed prices higher for a substantial number of issues. The number of coins netted from these advancing levels is quite limited---due to the simple fact that very few dealers have such top grade pieces in their inventory. Or, if they do have a few, it is as a result of considerable effort---and the coins are probably already earmarked for their retail clients. Bid levels, however, are being raised in a relatively cautious manner---not as "exciting" as in the 1978-early '80 period perhaps---but certainly more orderly (and more healthy). It should also be added that most of the current buying pressure is being applied to the more "basic" types. No doubt, there are also buyers for the "no stars", "with arrows", etc. issues---but, thus far, prices for these more expensive pieces remain firm at present levels.

We discussed several weeks ago that interest in "top end" AU coins in numerous series was strongly evident across the various teletype circuits. This interest continues---and, indeed, may have even increased over the past few weeks. There are several regular bidders who are trying to locate specimens variously described as "AU-59", "AU/BU", "super sliders", etc. Though greater interst is being evidenced for the larger denominations---dollars and halves---there are also buyers for quarters, dimes, nickels and even cents in this "almost there" category. An interesting note is that "well struck and mark-free" specimens are basically the ones that are wanted. The fact is that the "right" AU coins are generally more attractive than many of the pieces which technically fall into the more expensive MS-60 category. The MS-60 coin---by definition---is the lowest uncirculated grade. Thus these coins have problems ---weak strikes, marks, abrasions and/or lack of original luster. The "AU-59" specimens which are in demand, on the otherhand, merely exhibit only slight wear; the weakly struck, etc. pieces are not being accepted. As example, a carefully assembled set of "top end" AU Morgan dollars---well struck and relatively mark-free---will probably be far more appealing than a set of "technical MS-60's".

Whether or not a percentage of the "super sliders" being located are then offered for sale as another grade is, of course, a matter of conjecture. Overgrading, of course, is without a doubt a major problem in the industry. Today's collectors and investors should always examine potential purchases for that slight bit of wear as well as for the other more obvious features of luster, strike and detracting marks.

This Week's Market

CENTS: Frequent and higher bidding among the MS-65 "type" cents has resulted in three new plus signs this week. Flying Eagles are now wanted at $1375 (up $150), the 1859 Indians at $1325 (also up $50) and the 1860-64 copper-nickel cents at $575 (up $15). None has been located in sufficient quantities to fill current bidder needs.

Several advances are again scattered across the late Lincoln roll line-up. At least two major buyers are in the market for bag quantities; higher bid levels haven't produced very many sales.

NICKELS: Three-cent nickel pieces in gem MS-65 condition have moved to $650 bid---with the same coin proof-65 moving to $630. (Gem proofs from 1879 thru 1889 are a bit easier to locate than are gem uncirculated specimens---even from the early, large mintage years.) Liberty nickels have also registered gains in both categories: MS-65 - $590; proof-65 - $790.

Except for continued interest in original BU rolls of 1938-D Buffalos---and the occasional bid for a date or two in the Jeffersons---this area remains quiet and lightly traded.

DIMES: The very scarce MS-65 "reduced size" Bust dime is now receiving bids of $3900 (up $100). Neither this issue nor the even tougher "large size" version is encountered with any frequency in today's thin market. Among this week's other "type" advances: MS-65 Barber dimes - $725, both "legend obverse" Seated Liberty and Barber dimes in proof-65 - $1200, and proof-65 Mercury dimes - $210.

Common date P-mint Mercury rolls continue to interest several potential buyers---now at an advanced $395 for the 1942-44 issues and $375 for the 1945. The Roosevelts are unchanged---with some bargain-hunting noted.

QUARTERS: Here, too, the "more easily located" type issues are enjoying buyer attention---and higher bid levels. In the MS-65 category, Barbers are now wanted at $1150; in proof-65 condition, the "no motto" Seated Liberty has moved to $1575 and both the "with motto" S.L. and Barber are now bid at $1450. (A couple of small gains have also been recorded in the MS-60 column---see page six.)

Scattered attempts to locate strictly graded MS-65 pre-1941 Washington singles at current bid levels are not meeting with much success ("just miss" specimens, however, are frequently encountered). As with the Roosevelts, most of the bidding among the Washington rolls is still of the bargain-hunting variety. Thus, very few transactions are being registered.

HALVES: As is true for all of the smaller denominations, the "floating supply" of conservatively graded gem type halves has all but dried up. A number of dealers who were sellers a few months back are now buyers---and edging their bids a bit higher isn't producing many results. This weeks gains in the MS-65 column include: "No motto" Seated Liberty - $2250, the "with motto" - $1950 and the Barber - also $1950; in proof-65 the Barbers are bid now at $2350.

And several of the pre-1941 Walking Liberty singles in MS-65 condition are also getting into the act: 1934-D - $775, the tough 1934-S - $1300, 1935-D - $800, 1935-S - $950 and the low mintage 1938-D - $1250. The later P-mint W.L. rolls, too, remain elusive at last week's bid of $1125. In addition, several dealers are definitely still in the market for "choice original" rolls of most Franklins (at or near present price levels).

DOLLARS: Trade dollars in gem MS-65 are still very few and far between even though bid has moved to $2650---and the proof-65 version is even more difficult to find at this week's higher $3200. Again, see page six for other gains in the MS-60 and MS-63 columns.

Basically unchanged bid levels over the past couple of weeks do not indicate a lack of interest in BU dollar rolls. To the contrary, strong buying attempts continue for "choice rolls containing a liberal number of MS-67's"---with only limited sales taking place. (It is now a lucky dealer indeed who locates an original bag of any date.)

Nor are the MS-65 singles being ignored. In this area, however, bids vary to a degree from buyer to buyer---with the "fussiest" frequently offering to pay over bid for the "right" coins.

Even though bid has advanced slightly for the 1971-S "blue" Ike (40% silver BU), there really isn't much to report for this late series. The recent "flurry" has apparently subsided---and bargain-hunting once again prevails.

PROOF SETS and MINT SETS: Minor ups and downs mark this area---as usual (with moderate trading being recorded). The 1979-S "type two" set is up $5 (at $125 bid); the 1981-S "type two" is steady at last week's $120.

COMMEMORATIVES: Another extensive rash of plus signs is being enjoyed by the XF/AU silver commems. As has been stated previously, there are many issues which are more elusive in this condition than in MS-60 or MS-63---and current bidding are finding only an occasional coin or two at these new higher bid levels.

Among the eleven gold commems, two issues have moved forward in gem MS-65: the really tough $2½ Pan-Pac - $5250 and the most "common" gold piece of all, the $2½ Sesqui - $1150.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $433.60 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

[illegible] MS-63 (PROOFLIKE UNCIRCULATED) Will have no or bag marks, [illegible] may show only a slight weakness of strike. These are well above average coins

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but very nice) percentage of available uncirculated specimens of any date

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

Vol. XX No. 49 | December 10, 1982 | Single copy price: $2.50

CAUTIOUS GAINS CONTINUE IN SEVERAL AREAS

Comments on "Original" BU Rolls in Relation to Gem Singles

The Market in Depth

ALLEN HARRIMAN

By now there are few readers who are unaware that an "original" BU roll of silver dollars does not necessarily include a single gem MS-65 coin. Indeed, such rolls of most issues in both series probably do not include any gems---even if they are truly original and have definitely not been "cherry picked". This is due to the problems of strike and to the problems of marks and abrasions. To varying degrees, therefore, gem MS-65's constitute a very small percentage of the extant uncirculated coins of every date---and today's bid levels certainly reflect this scarcity.

These facts have been brought to the forefront, of course, by the continued search for strictly graded gem dollars over the past few years. However, far less attention has been directed toward "original" BU rolls in the other series. And, thus, there is still the lingering impression that such rolls of the smaller denominations are "gem" rolls. Not true! While "original" silver dollar rolls are generally of lower quality than those in other series, it is now becoming more and more evident that undisturbed rolls in any series can be somewhat disappointing when the coins are examined individually. Lincoln rolls are plagued with spots, marks and unattractive toning. Prime examples in this area are 1934-D, 1935-S and the 1943-PDS issues---but less than desirable cent rolls are plentiful across the entire group (including even the late dates). Most of the Buffalo "short set" rolls also present the problems of strike, marks and poor luster. Finding, for instance, even one or two gem MS-65 1935-D's in a "bank-wrapped" roll is an occasion for celebration. In addition, there are many dates in the Jefferson series which more often than not come in original rolls which grade overall MS-63 at best.

The Mercuries, Roosevelts and Washingtons tend to be better than the cents and nickels. But, here too, the original roll will almost certainly contain a liberal scattering of MS-63's---especially when the coins are viewed by today's fussy potential buyer. And, though an original roll of Walking Liberty halves was once thought of as a "gem roll", today's exacting requirements have taken the vast majority of such rolls out of this category. Even the almost always sharply struck P-mint rolls usually include a high percentage of pieces which exhibit too many marks and/or abrasions to be classed as gem MS-65's---and the usually weakly struck S-mints offer even more problems.

This leaves us with the Franklins. One dealer recently observed that no other modern series is plagued with as many problems as are the Franklin half dollars. There well may be no gem roll in this series (unless it was carefully assembled)---no matter what date or how "original" the roll is! Going through a few rolls will prove the valadity of this statement. The quality varies from date to date, of course---but with very few exceptions, locating a true gem MS-65 or better specimen in this series is not simply a matter of picking the finest coin out of a roll or two.

Current bid levels for MS-65 silver dollars already strongly emphasize the actual scarcity of today's gems. There is no doubt that the coming years will see more and more of a premium placed upon such top quality pieces in all other series.

This Week's Market

CENTS: Advances have continued this week for the very elusive one-year-of-type 1859 Indian head cent (with bid now registered at $1375) and the 1860-64 copper-nickel Indians (wanted now at an even $600). These bids, of course, are for conservatively graded gem MS-65 specimens.

Numerous earlier dates have been added those "want lists" asking for BU Lincoln rolls. From 1934 thru 1942 plus signs dominte---along with another liberal scattering of gains for the 1961-78 issues. Bidders continue to seek quantities of choice rolls.

NICKELS: "Type" nickels are also sporting further advances. These include:

Shield nickels in MS-65 - $825
"no cents" Liberty nickels in MS-65 - $275
"no cents" Liberty nickels in proof-65 - $1175
Liberty nickels in MS-65 - $610
Liberty nickels in proof-65 - $800
"type one" Buffalo nickels in MS-65 - $120

The lone change among the BU rolls has been earned by the 1938-D Buffalo---bid has moved to $615. Trading in this area remains light.

DIMES: Three of the half-dime type issues have moved ahead this week in the MS-65 column: the "stars obverse" version is now receiving bids of $1550, the "arrows" type is wanted at $1675, and the "legend obverse" at $1300. And the two Bust dimes in the same condition also continue to interest buyers at higher levels: the "large size" at $5250 and the "reduced size" at $4050. (See page six for the advances noted for proof-65's)

Further attempts to locate common P-mint Mercury rolls (at current bid levels) are meeting with very little success. The only price advances among the BU rolls for the week have been recorded for the late bullion-related issues.

QUARTERS: The "basic" quarter type coins remain on buying lists in strict MS-65 condition. The "no motto" Seated Liberty has moved forward with a new bid of $1800---and the "with motto" is now bid at $1550. (Again, see page six for the advances in the proof-65 category.) It must again be stressed that today's buyers are fussy---nothing less than gem MS-65 will do!

For a pleasant change, a number of Washington rolls have edged ahead this week: 1946-P - $140, 1946-S - $190, 1948-P - $140, 1951-D - $132, 1952-D - $140 and 1953-D - $120 (these along with the later bullion-related rolls). Most of the sellers in this area have disappeared over the past several weeks.

HALVES: Bust half dollars are now in demand in all three uncirculated grades: MS-60 - $375, MS-63 - $775, and the very tough gem MS-65 - $3100. Other half dollar type advances include:

"no motto" Seated Liberty in MS-65 - $2350
"no motto" Seated Liberty in proof-65 - $2275
"with motto" Seated Liberty in MS-65 - $2000
"with motto" Seated Liberty in proof-65 - $2050
Barber in MS-65 - $2000

Five of the earlier Walking Liberty halves have also registered further gains: 1934-D - $750, 1934-S - $1325, 1935-D - $825, 1935-S - $975 and 1938-D - $1275. As with the Mercuries, the common P-mint rolls remain in demand at current bid levels.

The Franklin series, too, is enjoying numerous higher bid levels---along with a few scattered losses (see page three).

DOLLARS: Nor are the "type" dollars being ignored by current bidders---the MS-65 "no motto" Seated Liberty is now wanted at a higher $3400 and the even more scarce "with motto" version is receiving bids of $3700. The proof-65 Trade dollar has also advanced---to $3250.

Strong interest continues to be noted for "nice" BU dollar rolls (at present levels)---and numerous gem MS-65 singles in both the Morgan and Peace series remain on several regular buying lists. (As usual, two or three buyers will pay "over bid" for the "right" MS-65's.)

PROOF SETS and MINT SETS: Changes are again rather minimal---and in both directions. The 1981-S "type two" proof set has now moved ahead of the 1979-S version (a higher $125 vs. a lower $120). Trading among the other issues remains moderate and within current bid/ask ranges.

COMMEMORATIVES: Except for a couple of gains in the XF/AU column, the silver commems are steady at present levels. Demand, however, continues in all categories---although those bidders who are actively seeking MS-65's are still basically in a bargain-hunting mood. Locating gems at bid is not an easy task; a majority of the pieces sent to potential buyers are a bit overgraded. The $2½ Sesqui gold commem has advanced another $50 in the MS-65 column---bid is now $1200.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $444.80 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Will have many bag marks, may be poorly struck and show poor luster. However, they are free of heavy abrasions and defects, and will have some eye appeal.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

STRONG DEMAND CONTINUES FOR BU DOLLAR ROLLS

Frequent Bidding Nets Few Gem Type Coins; Several Gains Noted

The Market in Depth

ALLEN HARRIMAN

A few more plus signs will be found this week on the page five BU silver dollar roll chart. However, this light scattering of gains doesn't adequately reflect the current demand for dollar rolls. There are several regular bidders who are seeking quantities---lots, bags and multi-bag quantities. And they are willing to pay at least the present bid levels for virtually all dates. Actually, pinpointing bid prices for dollar rolls is complicated by the "quality factor". As is noted at the top of the price chart, "prices are for rolls which generally average MS-60+ to MS-63". Rolls of overall low quality (averaging only about MS-60) do not bring the prices quoted. On the otherhand, rolls which are well above average (nearly all MS-63---or even better) sell for higher prices. The tendency to fully describe the rolls being offered for sale is being more and more frequently noted---with price tags attached accordingly. Thus, this week's numerous gains in both the MS-60 and MS-63 price columns become even more useful in determing the value of rolls which do not fall into this MS-60+/MS-63 category.

It is evident that a number of dealers are now in the market for large quantities of single dollars---perhaps building their own rolls of a generally uniform quality. Though the spread between MS-60 and MS-63 "common date" dollars remains relatively small, current buyers are still strict in their grading. (The coin which is "almost MS-63" will not bring the MS-63 price anymore than the "almost MS-65" will bring the full MS-65 bid.) It is also quite evident that the frequent bidder who simply asks for "BU" dollars at prices somewhat above the MS-60 listings are not accepting coins which are merely MS-60. As has been mentioned several times previously, the MS-60 coin is only one point away from circulated (AU-59); it needs only to be uncirculated to be classified as MS-60---weak strikes and badly marked coins (the "bottom of the bag") are still technically uncirculated.

Turning to another area, trading among the 1959-81 mint sets and the 1956-to-date proof sets continues pretty much in the same pattern which has been established for many months now. Dealers frequently need varying quantities of specific dates---and they usually offer to pay current bid (or even slightly over) to get them. As stated, these buyers want only the dates they are bidding for---and, even if these particular issues are included in the many "lots" being listed for sale, such "lot" sales seldom result. Hardly a day goes by when mixed groups of numerous dates of both mint and proof sets aren't offered for sale---with slightly discounted pricc tags attached in order to encourage sales. At present, however, there aren't many buyers who are interested in any and all dates in either group. The vast majority of client orders are for those certain dates which may be "favorites" of the buyers concerned.

This Week's Market

CENTS: Another liberal scattering of plus signs will be found among the 1934-42 BU Lincoln rolls this week. (Spotted, fingerprinted, heavily toned or otherwise inferior rolls will not bring these prices.) The later dates also continue to appear on buying lists---with a number of 1956-69 issues wanted in quantity at still higher prices.

Several of the "basic" half-cent and cent type coins remain on dealer "want lists"---mostly at current levels.

NICKELS: The 1938-D Buffalo roll is slightly higher at $625 bid (with at least one buyer already willing to pay $650 for a gem roll or two). Little interest is noted for the remaining dates in the 1934-38 group. And the Jeffersons continue to reflect very light trading (and a bit of bargain-hunting).

Three-cent nickels have moved ahead in both MS-65 and proof-65 condition; bid is now $675 in both of these grades.

DIMES: "Type" half-dimes have registered gains in three categories: the "stars obverse" in strict MS-65 is now bid at $1600, the "legend obverse" at $1325, and the proof-65 "legend" is wanted at $1450. To repeat, strict grading is a MUST!

The 1942-D & S Mercury rolls have advanced to respective higher bids of $800 and $975. (And, it should be noted, one major dealer recently stated that he would pay ask for choice "non-cherry-picked" rolls of nearly all of the 1934-45 rolls.) Another gain has been recorded by the still elusive 1948-P Roosevelt roll; bid is now $315. The 1954-D and 1955-P rolls have also edged slightly higher.

QUARTERS: Scattered dates among the Washington rolls continue to appear on relatively brief "want lists". The only plus sign this week, however, is carried by the 1946-S roll; bid is now $195---with one buyer offering $200.

Three more gains have also been registered by "type" quarters: the "no motto" Seated Liberty is now bid at $1825 in MS-65 and at $1675 in proof-65---and the "with motto" is wanted at $1550 in proof-65.

HALVES: Frequent attempts to locate a number of Walking Liberty singles in the 1934-40 group continue to be monitored---at last week's levels. Surprisingly few properly graded pieces are being traded. The search also continues for most of the Franklin rolls---with a few minor increases recorded. The 1970-D Kennedy roll has moved up to an even $500 bid.

Bust half dollars are still on the move in all three uncirculated categories: MS-60 - $400, MS-63 - $800 and MS-65 - $3300. Remember, "close is not good enough"---conservative grading standards are definitely in effect.

DOLLARS: A number of gains will be found in both the MS-60 and MS-63 Morgan columns this week. More and more buyers are in the market for dollars in these grades---see "The Market in Depth". A few "strict graders" remain in the market for gem MS-65's as well---with further advances being registered for scattered dates.

In "type", the Seated Liberty dollars are again higher in MS-65 condition: the "no motto" version at $3500---and the "with motto" at $3800. These are tough coins in this grade!

PROOF SETS and MINT SETS: The 1979-S "type two" set has suddenly begun to appear again rather frequently on buying lists; bid is again back up to $125. (The single "type two" Anthony dollar is wanted in quantity at $100---or a bit more.) The 1981-S "type two" set is also higher---at $130. The remainder of changes in this area are, as usual, light---and in both directions.

COMMEMORATIVES: Bargain-hunting is still the rule being applied to the silver commems. Lengthy "below market" buying prices are being monitored---with few if any strictly graded specimens being cornered. Three of the gold commems are a bit lower this week---see page two.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $443.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

VG (Very Good) A coin that has been heavily worn but the design and lettering are still bold enough to be clearly seen. Some of the finer details may be worn smooth. Rim may be worn into the lettering in spots.

FINE Moderately worn coin showing all major details. Some of the finer details are worn smooth. Rim is worn into the lettering in spots.

VF (Very Fine) Lightly worn coin showing all major details. Some of the finer details are worn smooth. Rim is worn into the lettering in spots.

XF (Extremely Fine) Lightly worn coin showing all major details. Some of the finer details are worn smooth. Rim is worn into the lettering in spots.

AU (About Uncirculated) Lightly worn coin showing all major details. Some of the finer details are worn smooth. Rim is worn into the lettering in spots.

MS 60 (UNCIRCULATED) Will have many bag marks, may show only a slight weakness of strike. These are well above average coins.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOF-LIKE (CHOICE UNCIRCULATED PROOF-LIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror proof-like surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 --but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

Vol. XX No. 51 | December 24, 1982 | Single copy price: $2.50

PLUS SIGNS APPEAR ACROSS MOST CHARTS

This is The Final Issue for 1982....Happy Holidays!

The Market in Depth

ALLEN HARRIMAN

This final issue of 1982 is a bright one! Plus signs will be founded well scattered across nearly all of the charts from the page one gold type issues thru the page six type coin listings---as well as on many of the various charts in the enclosed December issue of the MONTHLY SUMMARY. Over the past weeks the number of buyers has increased significantly---and sellers have either disappeared or have strengthened their selling prices. Bargain offerings in most areas are now quite limited---except, of course, for material which is optimistically graded. It should be noted that, although numerous dealers are now in a buying mood, they have not loosened grading standards. Dealers want only strictly graded coins regardless of the category in which they are bidding. A "shakey" XF will not bring full bid any quicker than a borderline MS-65 will bring the bid listed in that column. Naturally, this does not mean that a percentage of sellers aren't continuing to "try their luck" in offering coins which are "close". Thus, the large amount of returned material.

Perhaps the toughest area in which to pinpoint exact bid/ask levels is MS-60. Buying lists are frequently monitored which qualify bids for coins of this grade with such terms as "clean coins only" (presumably mark-free---or nearly so), "choice" (which technically is MS-63) or some other terminology which leads to the belief that these particular buyers are actually looking for coins which are better than MS-60. As has been discussed from time to time, the only characteristic which a coin need exhibit to fall into the MS-60 category is a total lack of wear---wear from circulation or from improper storage and/or handling. There are "MS-60" bids which are higher than those reported. But the frequent bids which carry qualifications similar to those above cannot legitimately be used to determine strict MS-60 bid/ask levels.

Virtually all of the dealers we have spoken with are looking forward to the approaching F.U.N. Show (January 5-8 in Orlando, Florida) with a great deal of enthusiasm. This first major show of each year is always a very popular one---drawing dealers, investors and collectors from all parts of the country. A high percentage of those planning to attend this year are apparently in a "buying mood". Attempts over the past weeks to replenish drastically diminished stocks have met with only limited success---and hopes are high that opportunities will abound at F.U.N. The Kurt Krueger auction, which will cover all four days of the show, includes an extremely impressive and comprehensive run of copper, nickel and silver proof coinage from 1858 thru 1912---as well as important offerings in numerous other areas. The prices to be realized at this auction (along with bourse table and "private treaty" sales) will undoubtedly have a major impact upon the "mood" of the market during coming months---and quite possibly upon trading throughout 1983!

PLEASE NOTE that this is the final CDN for 1982---traditionally, no issue is published between Christmas and the New Year. Have a happy holiday season!

This Week's Market

CENTS: The proof-65 copper-nickel cent is bid this week at a higher $1450; finding even a single problem-free specimen can be quite difficult. Gem proof-65 common date Indian cents have also advanced---to $800 bid.

Several small gains arc again scattered across the BU Lincoln roll chart---see pages two and three.

NICKELS: Potential buyers of gem proof-65 1936-37 Buffalo nickels are now offering to pay $1100 (an advance of $100). Again, top quality examples are few and far between (with a large percentage of the extant pieces permanently impounded in corresponding proof sets).

Except for continued bidding in the $600-$625 range for choice rolls of 1938-D Buffalos, activity remains very light in both of the nickel series.

DIMES: Several gains have been registered for "type" this week: in MS-65, the "legend obverse" Seated Liberty dime is higher at $950 bid, the very tough 1873-73 "arrows" version at $4750, and the Barber at $750; in proof-65, both the "legend" S.L. and Barber have moved to $1250 bid. Strict grading, of course, is a MUST!

"Want lists" this week have included many of the 1934-45 Mercury issues---along with all of the 1946-64 Roosevelts. However, with the exception of the 1942-S (higher at $1000 bid), bidders are sticking with current levels. Bargain-hunting is largely unsuccessful.

QUARTERS: Accurately graded gem MS-65 Barber quarters have gained a bit more---with the latest bid pegged at an even $1200 (up $50). The Seated Liberty issues also continue to appear on buying lists---at the levels reached during recent weeks.

As with Roosevelts, "want lists" have begun to include all of the Washington rolls---with bids at or near present levels. Only a few choice rolls are being located at today's prices.

HALVES: The latest increases for pre-1941 Walking Liberty singles include: 1935-P - $220, 1936-P - $210, 1937-P - $220, 1938-P - $420, 1939-P - $340 and 1939-D - $285. (The search also continues for all of the other dates in this group.) Bidding is still strong among the Franklins---with gains noted for the 1948-D, 1949-D and 1953-D rolls. See the enclosed December MONTHLY SUMMARY for the extensive advances recorded by the singles.

DOLLARS: Many of the BU dollar rolls are again enjoying higher bids; quantities of every issue on the page five chart are wanted. Lengthy buying lists for singles are also regularly monitored---with plus signs thoroughly scattered across the MS-60 thru MS-63 prooflike columns. There are several bidders!

With the exception of a tiny gain for the plentiful 1971-S 40% silver BU issue, the Eisenhower series remains at last week's levels. Mixed lots are frequently available within bid/ask ranges.

PROOF SETS and MINT SETS: The 1979-S and 1981-S "type two" proof sets are both wanted at higher respective bids of $130 and $135; trading remains light due to limited availability. Changes among the other dates in both groups are very minor.

COMMEMROATIVES: A number of higher bid levels have been registered for the MS-60's and MS-63's in both the silver and gold series. Not surprising, agreement on grading is often a problem when trading commems. Current buyers must be placed in the "fussy" category.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $441.90 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence of rubbing or friction. However no further qualifications are necessary (it will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

	BID (MS-60)	ASK	BID (MS-63)	ASK	BID (MS-65)	ASK

COIN DEALER *newsletter* BACK-ISSUES AVAILABLE

Complete your FILE of NEWSLETTERS!

We still have available a limited number of back issues since publication began on June 14, 1963! Your completed file will enable you to "chart" your favorite issues . . . to pinpoint trends and to spot the best buys in the current market.

And, of course, the in-depth Monthly Summary articles and pricing guides (which began in August, 1976) have covered virtually every aspect of U.S. Numismatics. These studies have been authored by many of the country's leading numismatic authorities . . . and are a "must" for any library!

BACK-ISSUE PRICES:

1 to 10 Issues . . . $2.50 each	26 to 100 Issues . . . $1.50 each
11 to 25 Issues . . . $2.00 each	over 100 . . . . . $1.00 each

For entire series, write (or call (213) 666-8717) for cost.

For complete listing of Summary articles, please send self-addressed, stamped envelope to: **the COIN DEALER NEWSLETTER**
P.O. Box 2308 / Hollywood, CA. 90028-2308

All orders shipped Air Mail/First Class same day as order received. (Large orders shipped UPS (requires street delivery address).
